

Bowdoin College

Commencement 1979

AARON JEFFERY SHATKIN, OF THE Class of 1956, summa cum laude; Doctor of Philosophy of Rockefeller University. One of Bowdoin's most distinguished graduates in the sciences, his research in biochemistry and molecular biology has earned him an international reputation: through publications, editorial responsibilities and teaching, he has shared with the world the results of his research in the Department of Cell Biology at The Roche Institute of Hoffman-LaRoche. In the great tradition of predecessor Bowdoin explorers, he has helped make the unseen seen and the unknown known.

Honoris Causa, Doctor of Science
