ILLINOIS CHAPTER OF THE SOCIETY OF THE SIGMA XI

PUBLIC MEETING

DECEMBER 11, 1912

Room 100, Chemistry Building, 7:30 p. m.

PROGRAM

Appointment of Delegates to Biennial Convention.

"Preliminary Announcement of the Crocker Land Expedition" . . .
W. E. Ekblaw

"The Eyes and Eyesight of the Lower Animals" (Illustrated) . . .
Dr. Casey A. Wood, Ophthalmologist
President American Academy of Ophthalmology

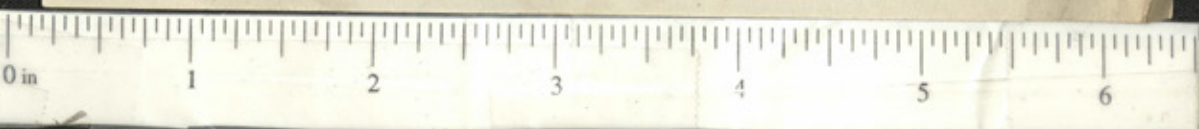

Social Meeting and Reception to Dr. Wood (Members and their
wives are invited) . . . Parlors of the Woman's Building, 9:00 p. m.

Refreshments under the direction of a Committee from the Zoology
Department.

Members are requested to invite those interested to attend the Meeting.

G. A. Miller, President

Edward Bartow, Secretary

New Bremen, Ohio. Feb. 10th. 1913.

Mr. W. Elmer Ekblaw.

Urbana, Ill.

My dear Mr. Ekblaw:

Your kind letter with enclosure of \$2.00 I received this evening. Thank you! There has been no delinquency on your part at all. Should you not have received all the copies of the Bulletin during the last year, notify Prof. Lynds Jones, Oberlin, Ohio at once and he will send you any missing numbers. I noted your requests and shall abide by them. You are certainly to be congratulated that you have the rare chance of going on such an expedition and I hope that you will have good health and good success. We will be very glad to have you give us popular articles on birdlife on your return, but still more if you would give us a scientific report on birdlife during your expedition, for it is just such things as these that make the Bulletin valuable and are the most desirable of all and are gladly accepted. We would be indeed pleased to have a short itinerary, a general description of the country and an enumeration of species observed with very full annotations.

Again wishing you success

I am yours sincerely

W. F. Hemminger

AMERICAN ORNITHOLOGISTS' UNION.

FOUNDED 1883.

INCORPORATED 1888.

NEW YORK CITY.

NEW YORK, Feb 11, 1893

Mr. W. C. C. E. E. E.
Albany, Ill.

Dear Sir:

In reply to your inquiry for "suggestions"
I have referred the matter to Mr. A. C. Bent.
By a some strange manner, in which events
some times happen, just as I was reading
your letter Mr. A. C. Bent who is going on
the expedition dropped in the office and

was pleased to learn that you were going and
stated that he would "get acquainted" by
writing to give information you needed for
us. Bent as I suppose you know is
working to complete the "Life Histories of
North American Birds". All the best wishes
for your success and safe return.
Very truly yours,
Harry Thurston

for
Dr. Dwight

American Ornithologists' Union,
American Museum of Natural History,
New York City.

Receipt for dues has been sent
to Rantoul. Ill as per letter
also "Ack"

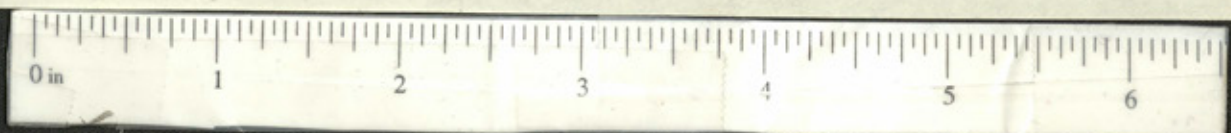

W. Elmer Ekblaw, of the Department of Geology at the University, who has been chosen as scientist to the Crocker Land Polar Expedition will give a lecture on Arctic Exploration next Wednesday afternoon, February nineteenth, at four o'clock, in Room 228, Natural History Building. Mr. Ekblaw will leave in late May or early June for New York to assist the party assemble its equipment, and complete the preparations for the sailing of its ship in late June or early July.

The lecture will include a resume of all Arctic Exploration, stating in detail the search for the Northwest and Northeast passages, the exploration of Bering Strait, the Sir John Franklin Expedition, and the search parties sent out to learn its fate, the exploration of the Arctic Archipelago, and the attainment of the North Pole. It will also describe the various American expeditions and what they have accomplished, from the time of Dr. Kane's first voyages to the latest Peary trip, especially those which have explored the territory adjacent to Kane Basin. The last half of the lecture will be devoted to an account of the plans and purposes of the Crocker Land Expedition, the personnel of the party of which Mr. Ekblaw is a member, and the equipment of the various men comprising it. The lecture is illustrated by numerous interesting slides.

Everyone interested in this hazardous expedition, both in general and because of the fact that a University of Illinois man will be one of the party, is invited to be

Dean of the Graduate School

Yale University

New Haven, Connecticut

Dear Sir:

Will you please send me, at your convenience,
a copy of your graduate school catalogue, blanks to make
application for scholarship and fellowship positions in
Geology in your school, and registration blanks?

Thanking you in anticipation of your attention to
my request, I am

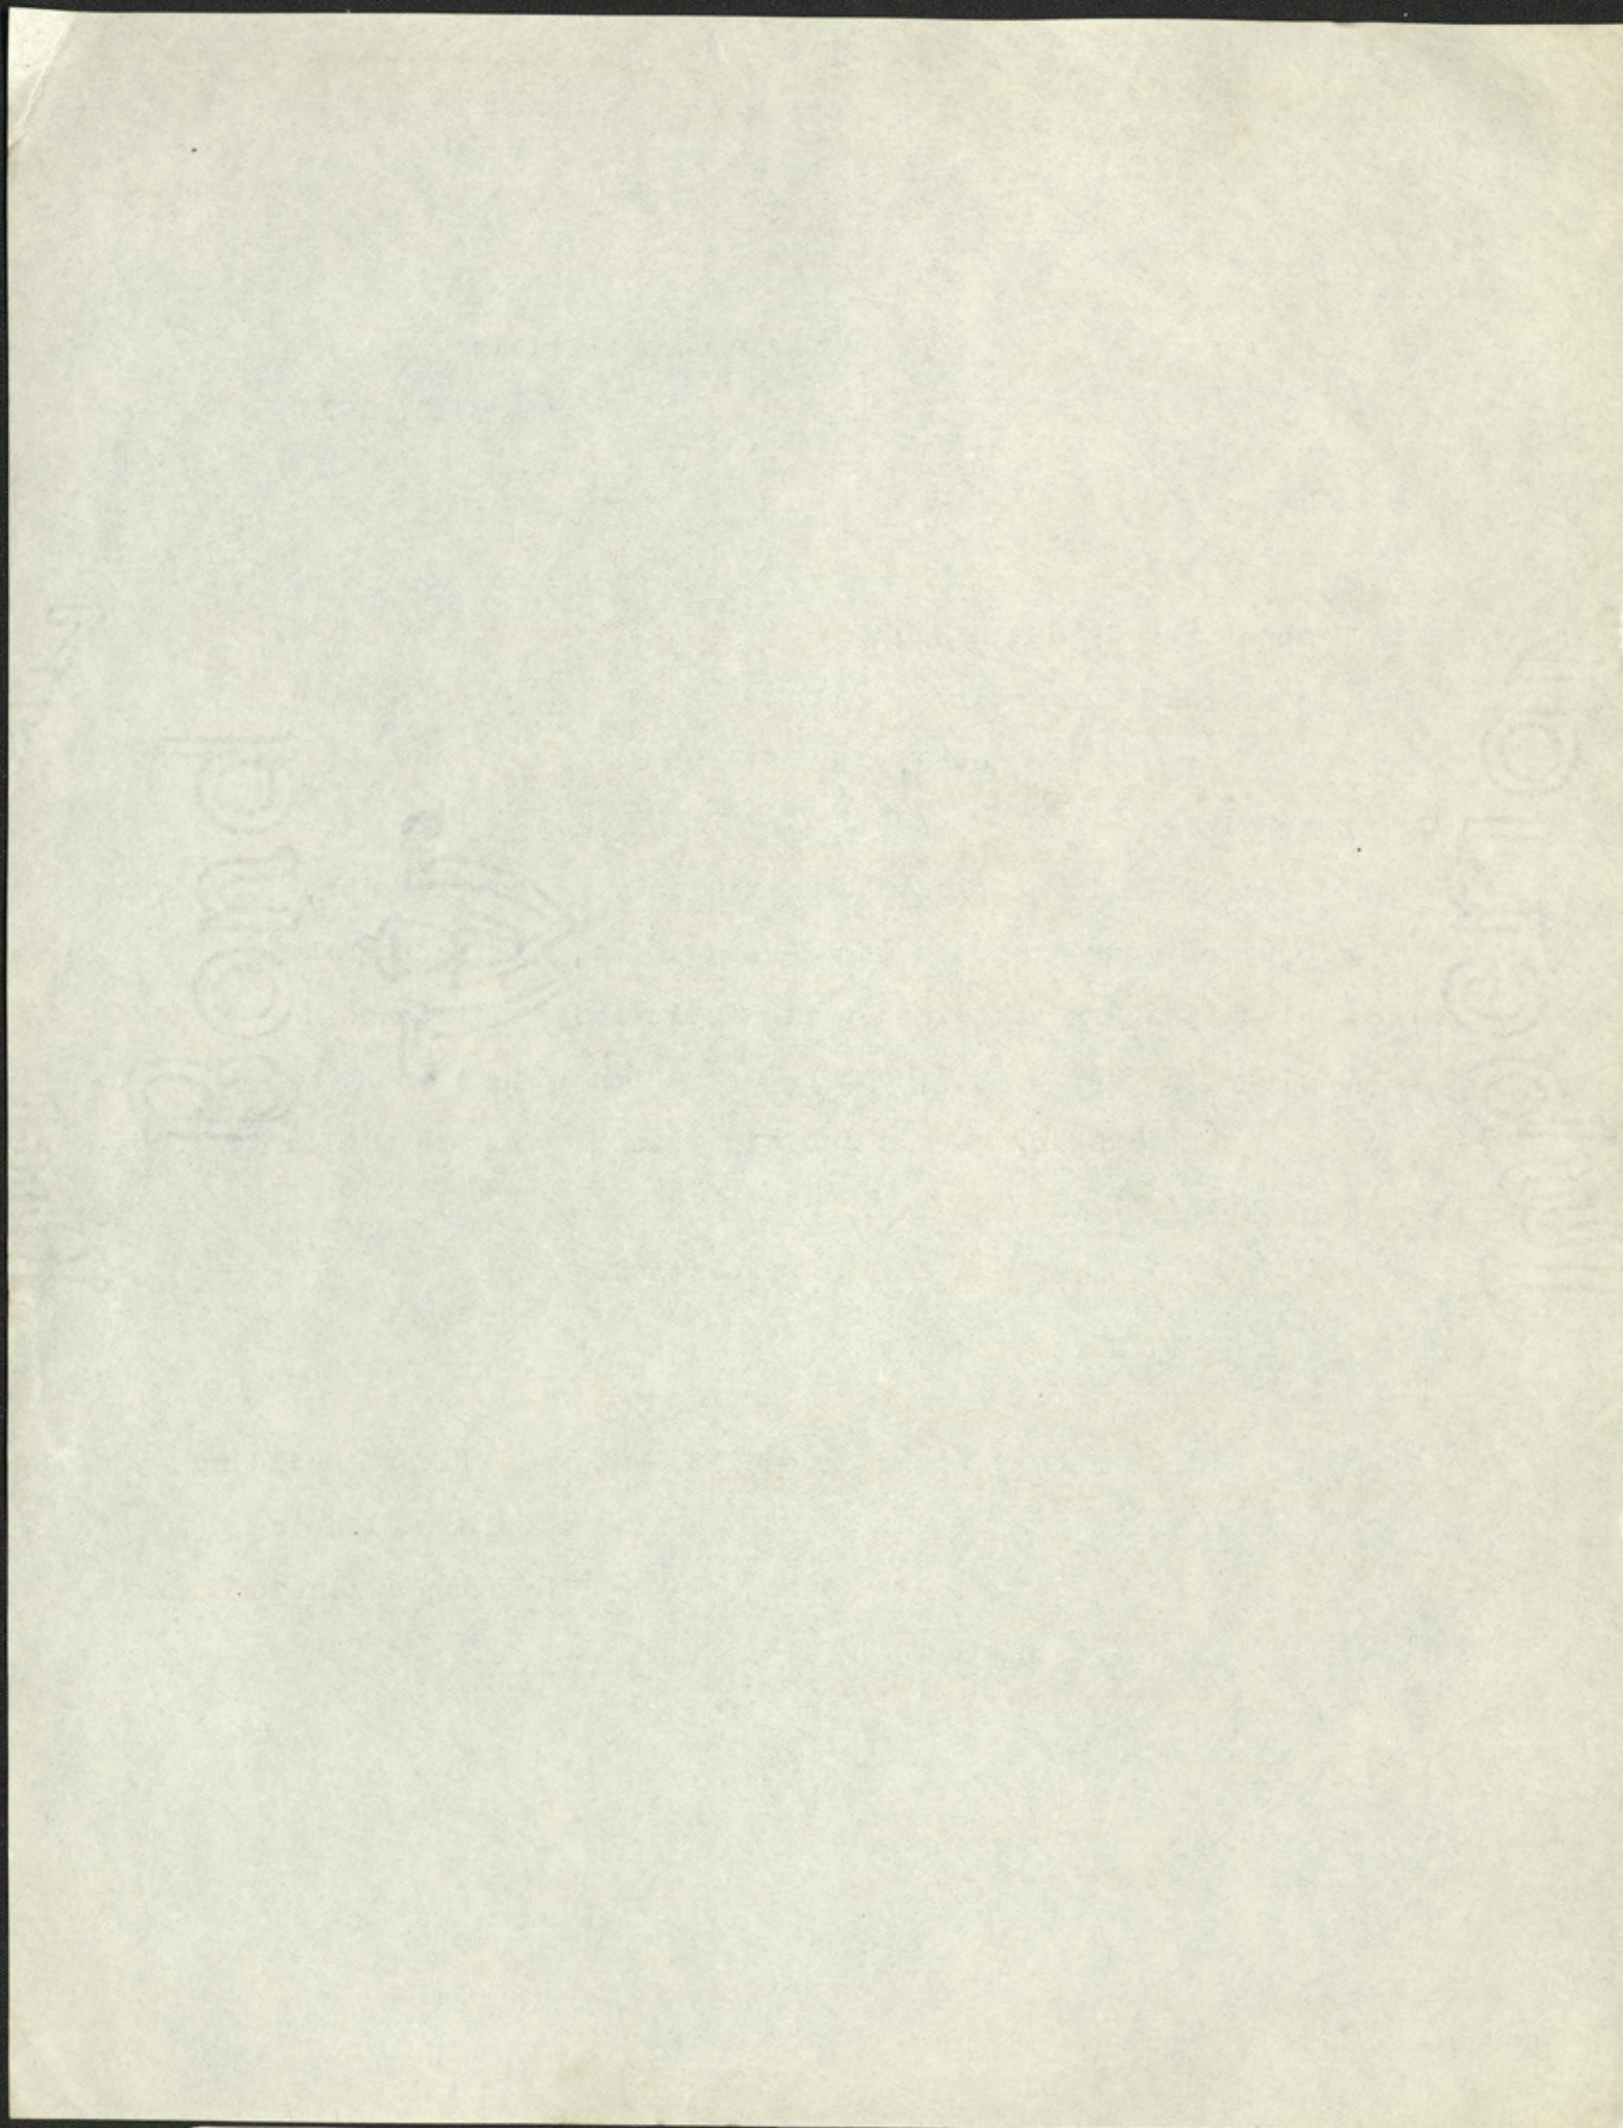

Very respectfully yours

Room 138, Natural History Building

University of Illinois

Urbana, Illinois

Urbana, Illinois, February 14, 1913

Members of the Faculty of the College of Science:

A College of Science Assembly will be held at four o'clock on next Wednesday afternoon, February 19, in Room 228 Natural History Hall.

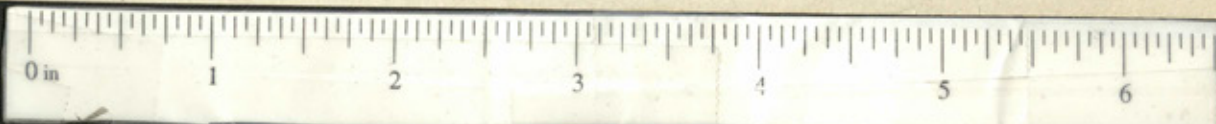

At this meeting Mr. W. Elmer Ekblaw of the department of geology will give an illustrated lecture upon "Polar Explorations." The lecture will comprise a brief resume of North Polar explorations, including the earliest attempts of navigators to discover a northwest passage, and an account of the geographical work that has been done along the shores of Baffin Bay and Kane Basin, with particular attention to the work done by American explorers.

Mr. Ekblaw will give a description of the plans of the newly organized Crocker Land Expedition which proposes to explore regions to the north of Alaska and along the Arctic coast in search of a large body of land supposed to exist in the Arctic ocean in that region. Mr. Ekblaw is associated with this party as scientist and expects to leave on the expedition next summer. He has some very interesting slides illustrating the work already done in the north.

Please announce the lecture to your classes and extend an invitation to all others who you think might be interested.

Very truly yours,

E. J. Townsend
Dean of College of Science

Elmer Ekblaw will deliver an address on his proposed trip to Crocker Land and other polar regions, in the Natural History lecture-room, Room 228, Natural History Hall, Wednesday, February 19th at 4 P.M. This occasion will afford an excellent opportunity for you and your friends to learn more of an expedition in which the University is to take a prominent part and for which our community is supplying the only representative of the natural sciences.

Feeling that you will be interested in the matter, I am taking this means of bringing it to your personal attention.

Very truly yours,

Leonard V. James

Normal, Ill., Feb. 24, 1913.

Prof. Elmer Ekblau,
Urbana, Ill.

My dear Sir:

Miss Frances Morehouse of our faculty has told me that if we pay your expenses you will come over to Normal on some Friday or Saturday evening and give your illustrated lecture on Crocker Land. We certainly are glad of this opportunity to set before our students some adequate notion of the revived ~~ed~~ interest in Arctic explorations.

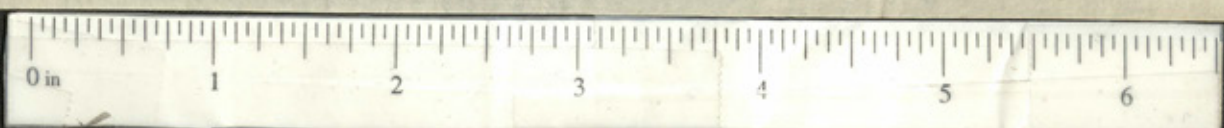

If it falls in with your plans we should like to have you come to lecture at eight o'clock on Saturday, April 5.

Yours very truly,

David Felmley.

February 25, 1913

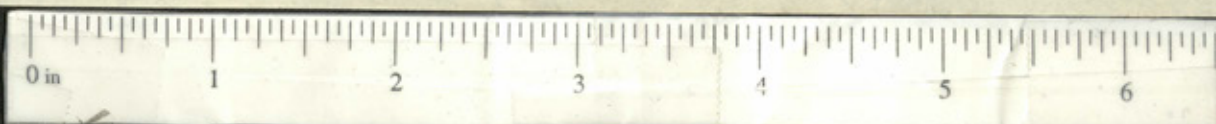

Mr. L. H. Bissell
111. Col. of Photography
967 Wabash Avenue
Effingham, Illinois

My dear Professor Bissell:

At the request of Mr. Donald B. MacMillan, of Cambridge, Mass., who will be the leader of the Crocker Land Expedition which leaves this next June on a two or three years' study in the North to explore the unknown portions of the Arctic Archipelago and the North Polar Seas, I am writing to you with the object of engaging for the expedition a professional photographer who understands the work thoroughly, who can adapt himself to meet problems in Arctic photography, who can do all the developing, printing and making of lantern slides necessary, and who can take moving pictures.. He must be physically strong and in good health, and able, if necessary, to learn to drive and handle a dog team.

Only one first class photographer, Anthony Fiala, ever went north and he brought back some wonderful pictures. It is a splendid opportunity for some virile young man to acquire unusual experience, engage in daring adventure, and also to obtain some incomparable pictures, as well as to put him into line for a good position in scientific photography. As scientist in charge of the expedition I am particularly desirous of getting in touch with a good dependable man who

Mr. L. H. Bissell --2

has the qualifications and is willing to attach himself to the party. The salary would be merely nominal. All equipment and supplies are furnished by the expedition.

If you know of any such man, will you please tell me of him, and also apprise him of this opportunity.

I thank you in anticipation of your early attention to my inquiry. I am

Very truly yours

Professor D. C. Ridgley
Department of Geography
Illinois State Normal University
Normal, Illinois

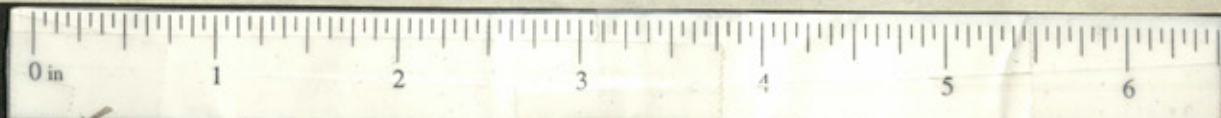

My dear Professor Ridgley:

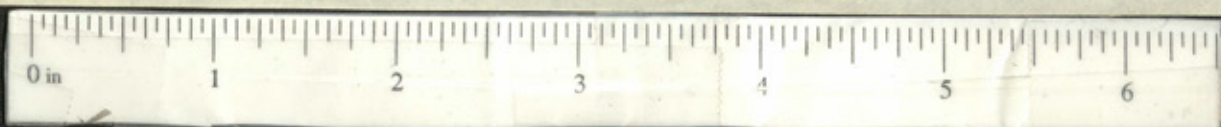

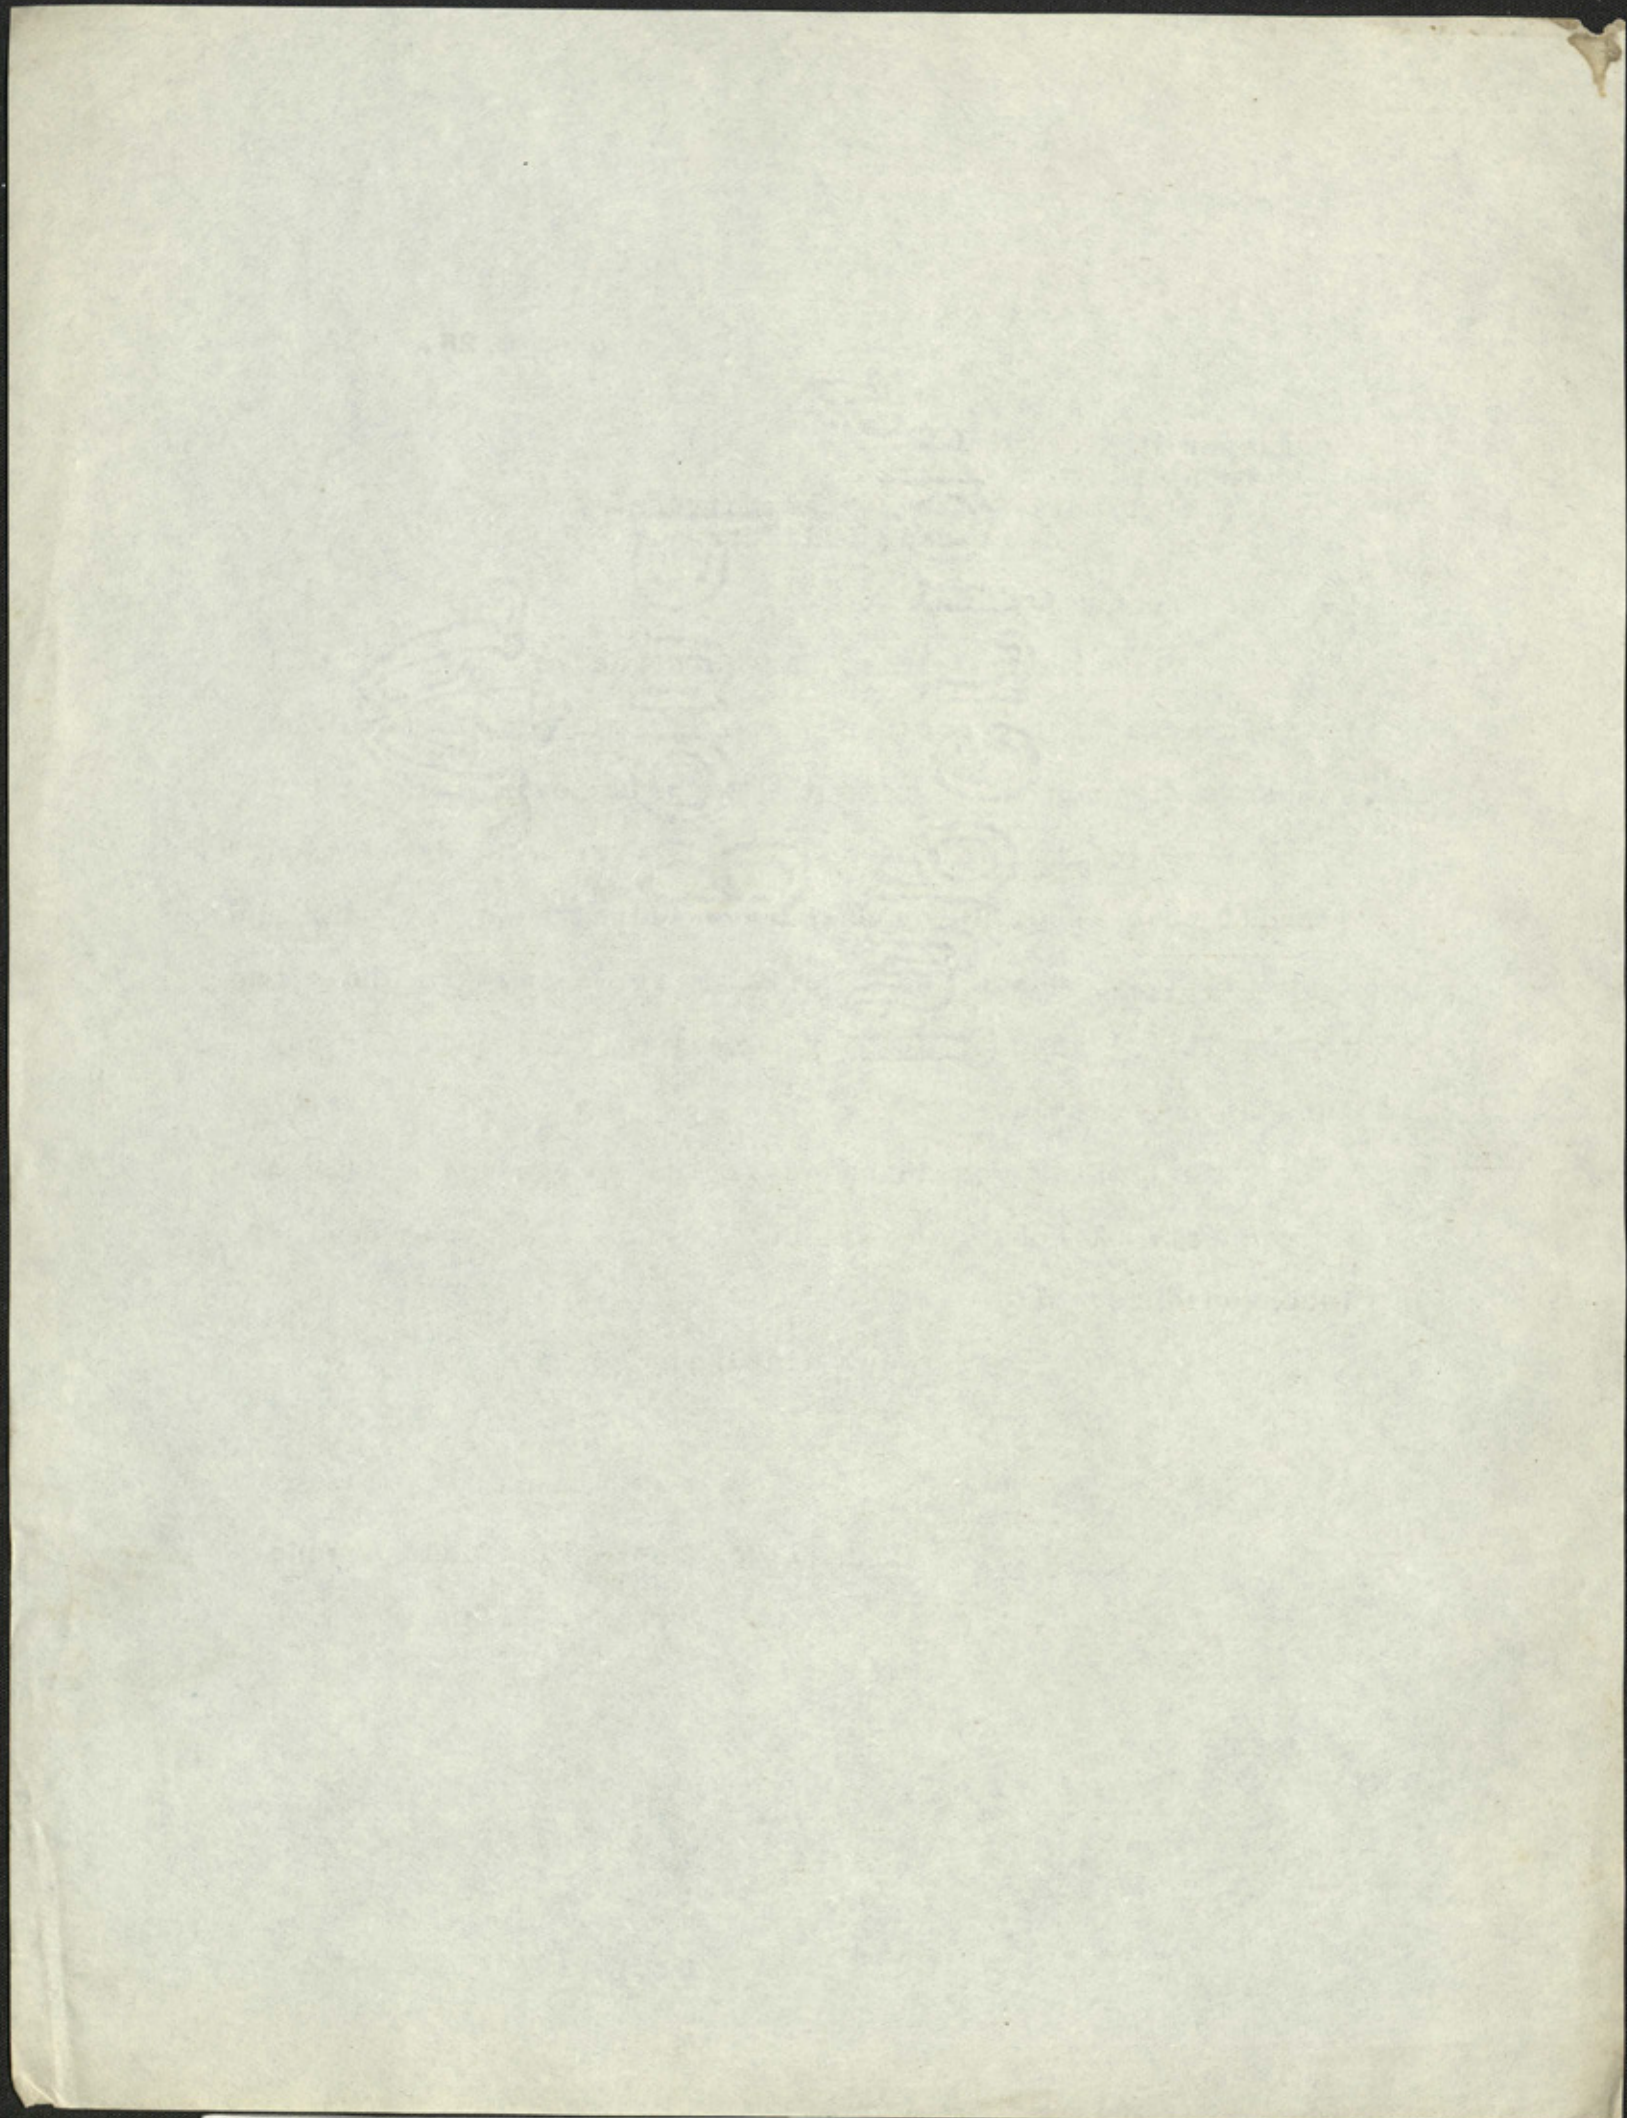

President Felmley has informed me that you will be in charge of the lecture which I shall give before the students of your University the Saturday evening of April 5, on "Arctic Exploration and the Crocker Land Expedition." I shall have about 30 or 35 slides illustrating my talk and I should like to ask you to arrange for a lantern and a man to run it. I know of nothing else that will call for any thought or trouble.

I thank you in anticipation of your attention to my request. I hope you will not be put to a great deal of inconvenience. I am

Very sincerely yours

1103 West Springfield Avenue
Urbana, Illinois

Urbana, Illinois

March 13, 1913

Mr. Alfred J. Lomen

Illinois College of Photography

Effingham, Illinois

My dear Mr. Lomen:

Because our blueprint shop is taxed to its capacity at present, I have been unable to have any slides made as yet; consequently I am asking you to let me have your book of views a little while longer. I have had no opportunity to show it to the President yet, and I wish to do so.

You have already heard from Mr. MacMillan, I presume, and I hope that you can adjust matters in your own mind so satisfactorily that you will accompany us, for I feel that you and the expedition will both profit by your going.

Lomen, it's the great adventure, the great opportunity, and I can't see how you can afford to neglect it. It's a chance that comes to but one man in a million. No one could criticize you for deciding to go.

The chairman of the committee in charge will be here later this month, I think. Could you come up to confer with him, if I should send you a telegram summoning you?

Hoping to hear soon from you, and thanking you for your permitting me to keep the book, I remain

Sincerely yours

1103 West Springfield Avenue

Urbana, Illinois

The spellings recommended by the Simplified Spelling Board are used in the correspondence of this office.

April 1, 1913.

My dear Mr. Ekblaw—

Yours at hand. We shall have lantern in order for use Saturday evening.

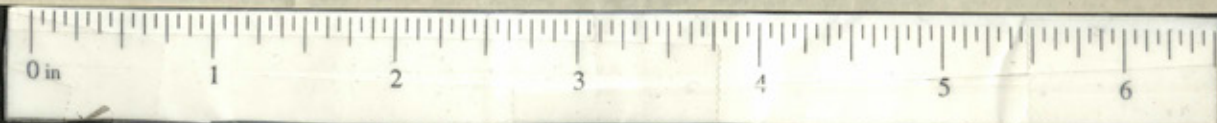

The lecture will be announced to begin at 8:10 Pm., the hour at which evening lectures usually begin.

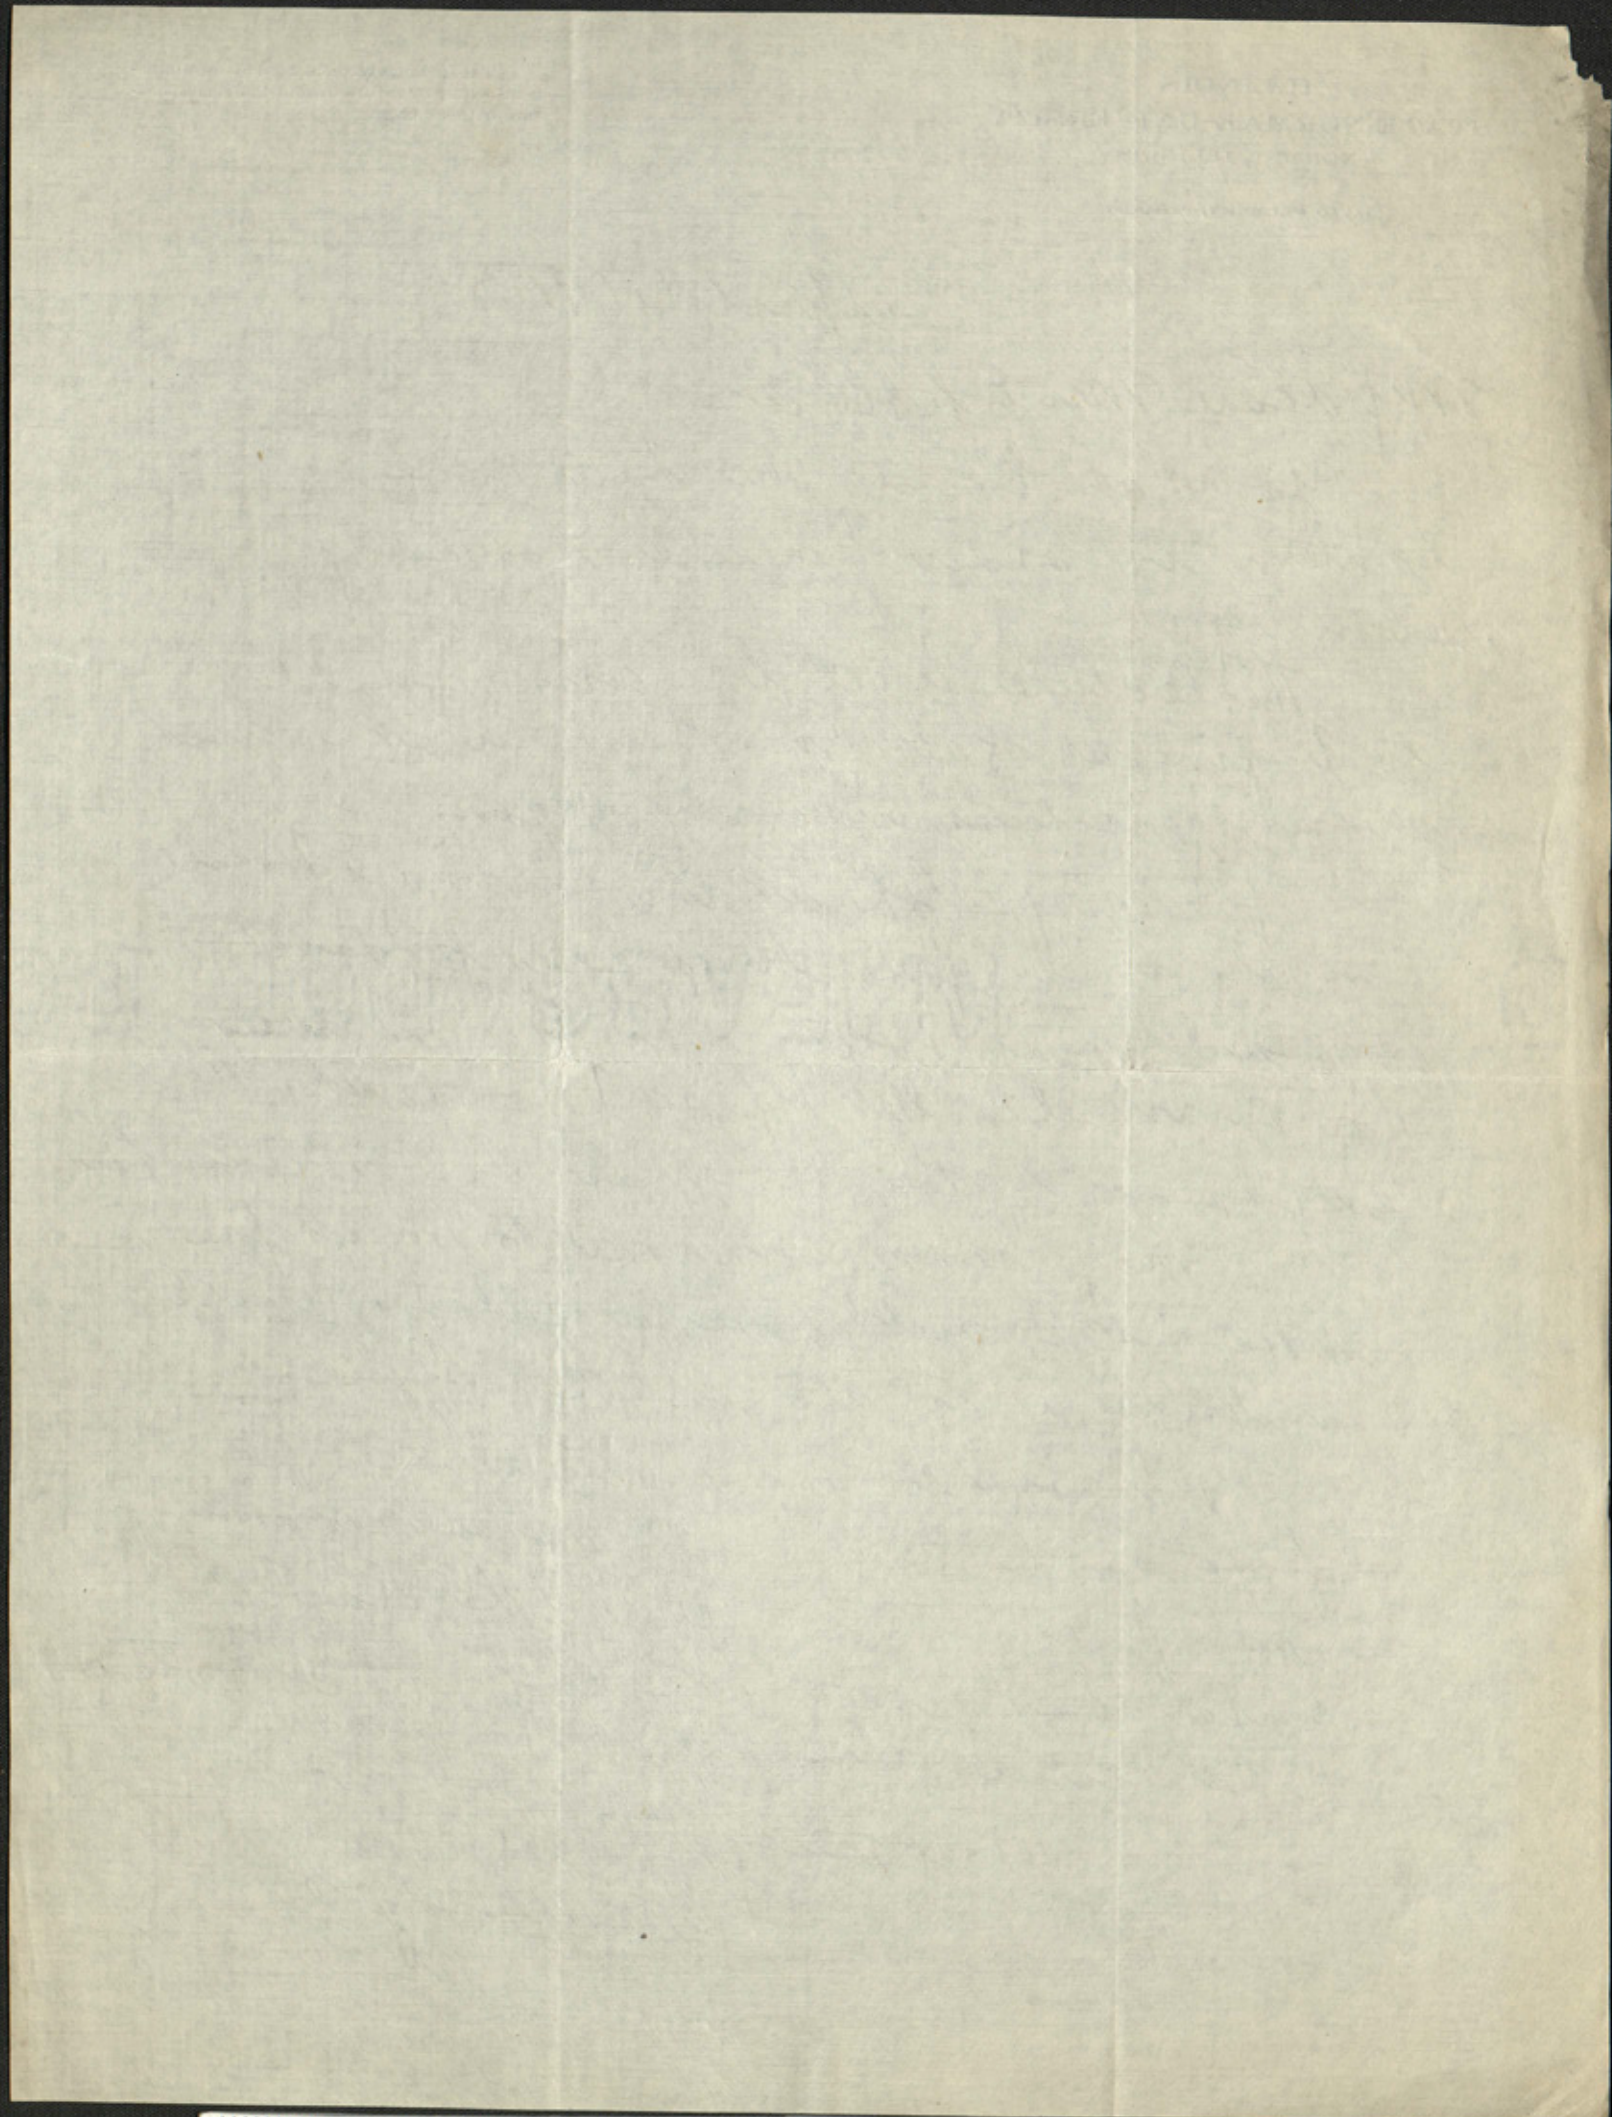

You may stop at the Illinois Hotel in Bloomington. Street cars leave the square near hotel every 10 minutes for Normal. Get off at North St., the entrance to the Normal School campus.

I may send some one to meet you at the hotel, but above directions will enable you to reach the place.

We hope to have an audience of several hundred. We are making it a free lecture. One of the daily papers has given a very nice notice of the lecture already.

Very truly,
D.C. Ridgley.

Urbana, Illinois

April 4, 1913

Professor D. C. Ridgley

Illinois State Normal University

Normal, Illinois

My dear Professor Ridgley:

In answer to your letter of April first I wish to assure you that it will not be necessary for you to send any one to the hotel for me, because Miss ^{nailed} Florence M. Morehouse, of your faculty, who is my friend and classmate, has written to me saying that she will see that I get safely to the lecture hall.

Trusting that my lecture will not disappoint you, I remain

Sincerely yours

1103 West Springfield Avenue

Urbana, Illinois

Urbana, Illinois

April 7, 1913

Professor D. C. Ridgley

Normal, Illinois

My dear Professor Ridgley:

I wish to thank you Professor Ridgley, for your kind attention to my every need while in Bloomington and to express to you my appreciation of the opportunity to address your people. I also wish to thank you for the generous manner in which you allowed my expenses and the unexpected additional remuneration you gave me. I should have been quite satisfied, anyway, just for the pleasure of meeting you.

I regret that the pressure of time forced me to hurry through so much of my talk, for I should like to have explained more fully the plans of our expedition and told you more fully of our arrangement. I hope, however, that when I return from the North, I shall have the opportunity of telling you a great deal that is more definite and more interesting.

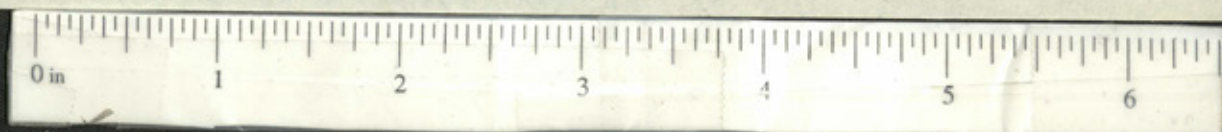

I wish to ask you, too, Dr. Ridgley to express my sincerest thanks to the gentleman who ran the lantern so well. I have never seen it better done.

With kindest regards, I remain

Sincerely yours

1103 West Springfield Avenue

THE ILLINOIS ARCTIC CLUB

COMMITTEE IN CHARGE

J. M. KAUFMAN
FRANK H. BOGGS
DEAN E. J. TOWNSEND
LEONARD V. JAMES

URBANA, ILLINOIS, May 24, 1913.

DEAR FRIEND:

The following is an article which has recently appeared in the Urbana Courier-Herald. Realizing that classmates and friends would be interested in the movement if brought to their attention, I am having reprints made and sent to them.

The Illinois Arctic club, composed of members and sustaining members, is a club organized as a tribute to Ekblaw and Tanquary, local arctic explorers, and with the additional purpose of providing such personal equipment as these men may need while on their proposed trip to Crockerland. The total amount necessary to be raised for this purpose is estimated at \$1,000. The committee in charge of funds is J. M. Kaufman, president; Frank H. Boggs, treasurer; Dean E. J. Townsend and Leonard V. James, secretary.

Manifest Local Interest.

The organization of the Arctic club is but one more step in the interest being displayed in this locality in scientific exploration. It has been six months since W. E. Ekblaw first contracted to assist in the exploration of Crocker-Land. Since that time the University has agreed to help support the expedition and as a result has had the privilege of naming the other natural scientist for the party. Dr. M. C. Tanquary, who was chosen, received the degree of doctor of philosophy here last June and has been professor of entomology at Kansas State Agricultural college for a part of the past year, returning here this spring to make definite preparations for the trip.

The expedition has already been featured to some extent in the local press. The entire movement is now to be featured in the May number of the Illinois magazine which will contain illustrated articles by President

James and by each of the explorers. In all probability 2,000 copies of this number will be printed instead of the normal issue of 500. The University has already contracted for half of this number for distribution among out-of-town alumni and it is felt that the rest will readily be disposed of among local people. Complimentary copies will probably be provided to the members of the club.

Discovered by Peary.

The proposed exploration of Crocker-Land is not a wild goose chase after a point on the ice having no significance aside from its geographical location. Crocker-Land was first seen by Peary in 1906 when he reported what seemed to be land not far north of Alaska and Eastern Siberia, but at some distance west of his route to ward the north pole. Other explorers have reported the same thing. The study of science suggests the existence in this region of an island or continent of about half the area of the section of the United States east of the Mississippi river, and it is probable that this land is the home of the original Eskimo and contains mineral deposits besides being of very great interest from a scientific standpoint.

Will Leave July 3.

The party of eight which will explore this region will leave New York on July 3, this year, and will be gone for from three to five years. The boat does not return for the first time until the summer of 1916 and it is possible that, even then, they will not be ready

to return. If success attends their efforts it is probable that they will also make a study of Northern Greenland and other Arctic regions. Of the eight in this party two of the principal members are the natural scientists, Ekblaw, geologist and botanist, and Tanquary, zoologist and entomologist, both natives of Illinois and graduates from the University. One other member will be a wireless operator who will endeavor to establish communication between the winter quarters at Flagler Bay on the west side of Kane Basin and a Canadian station at Cape Walstenholme in Hudson Bay, 1600 miles distant.

As suggested before the club is made up of members and sustaining members, the only difference between these grades being in the fees of one dollar and five dollars and in the names. The sustaining membership was established because the total amount to be raised is more than could be expected from ordinary memberships. At present there are a total of nearly one hundred subscribers, several of whom have taken out more than one sustaining membership and a third of the money has been raised or is in immediate view. The certificate which is supplied all members of both grades is a work of art, produced by Charles Morgan, art editor of the Illio, in each case without charge. Inasmuch as the time is too short in which to see everyone, those interested should correspond directly with the secretary who will issue certificates of membership upon receipt of fees.

Should you desire to join in this movement, send a check directly to the secretary, who will have a certificate forwarded at once. Please make the check payable to F. H. Boggs, Treasurer.

Yours very truly,

LEONARD V. JAMES,
Secretary.

Austin, Nichols & Co., Inc.

One of the most interesting cases in the Natural History Museum is that containing the Eskimo artifacts brought back by W. Elmer Ekblaw of the recent Crocker Land Expedition to Northwest Greenland and Ellesmereland. Though only a part of the ethnological material is yet on exhibition, it illustrates in rather complete manner the stage of development of the Smith Sound Eskimo, the farthest north people in the world.

The case contains models of the sledges, dog-harnesses, whips, and the many necessary accessory implements needed for travel over the ice, and of the kayaks, or decked-over skin-boats which are used in travel in the brief summer when the ice has gone out; of the many weapons of the chase, both on land and sea; of the pots and lamps and indoor utensils both in the winter snowhouse or igloo and in the summer sealskin tent or qupik; and of the games by which the children, and the grown people as well amuse themselves when the weather is too bad for outdoor work, or the night too dark.

Travel in the far north nearly always by sea, over ice for nine or ten months of the year, and by water for the short open period. Travel is very limited by water in the kayak, for only one person at a time can go in the frail little boat, and consequently only the hunters move about much in the summer, and they only when after game. As soon as the ice forms in October, however, all the Eskimos are on the move, visiting from one of their little settlements to another, whole families going in a body. A model sledge with all its necessary accouterments, properly lashed for the trail, and three models of kayaks are exhibited in the case.

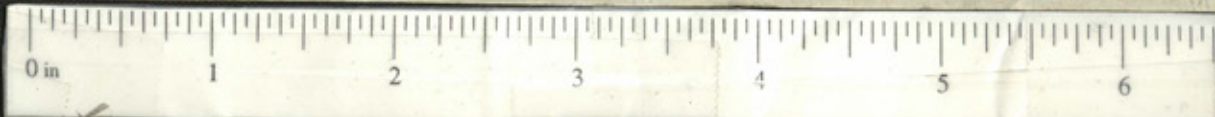

HOWARD BOND

Of the weapons of the chase, almost every type is shown. Bows made of overlapping pieces of reindeer horn, used in the old days for hunting hare, muskoxen, and caribou; harpoons, and killing irons, and floats and lines, for killing walrus, seal, narwhal, and whale in the sea; nets and snares for birds and hares; spears and nets for fish; all these and many more are exhibited, so that a most complete idea may be obtained of the way in which the Eskimo obtain their food, which as every one knows, is meat and blubber exclusively.

Mr. Ekblaw says that many of the most interesting of the native household articles are missing from the collection, for since Knud Rasmussen, the Danish explorer, established his trading-station in the land the Eskimos have been able to purchase all the knives, granite-wear pots and kettles, and other household utensils that they need, and have ceased to make the articles that they formerly used. He says that the tribe, which for so many years maintained itself as a distinct social unit, separated by hundreds of miles of well-nigh impassable ice, is not undergoing a rapid and almost complete transformation in its methods of life, so that in only a few years, only vestiges will be left of their own distinctive arts and industries. Likewise they no longer depend upon their unique cats'-cradles and the famous cup-and-ball games for amusement, but play cards, dice, football, chess and checkers. The many types of cats'-cradles that explorers have obtained from the Eskimo will soon be forgotten by the people who invented them.

ON D

HOWARD BOWEN

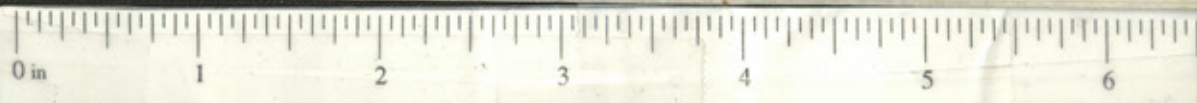

THIS AGREEMENT made this 1st day of July, 1913, by and between the AMERICAN MUSEUM OF NATURAL HISTORY, as party of the first part, and MESSRS. DONALD B. MACMILLAN, W. ELMER MEHLAW, FITZHUGH GREEN, MAURICE C. TANQUARY, HARRISON J. HUNT AND JEROME L. ALLEN, as party of the second part,

WITNESSETH: that

WHEREAS, the party of the first part, with the aid of the American Geographical Society, the University of Illinois, George Borup, Donald B. MacMillan, Fitzhugh Green and sundry other institutions, individuals and firms, has organized an expedition to the North Polar Regions which is to sail from New York in the U. S. "Diana" in July, 1913, for an absence of two or more years of exploratory and scientific work; and

WHEREAS, the expedition is to be known as "The Crocker Land Expedition under the auspices of the American Museum of Natural History and the American Geographical Society with the co-operation of the University of Illinois"; and

WHEREAS, the objects of the expedition are scientific in character and may be briefly summarized as: (a) the actual visiting, reconnoitering and mapping of the "Crocker Land" which R. E. Peary reports having seen in June, 1906, across the ice of the Polar Sea northwest of Cape Thomas Hubbard, Axel Heiberg Land, and Cape Colgate, Grant Land; (b) the scientific exploration of the region between Flagler Bay and Cape Thomas Hubbard; (c) the scientific exploration and mapping of the regions along the border of the Polar Sea northeastward and southwestward from Cape Thomas Hubbard at the north end of Axel Heiberg

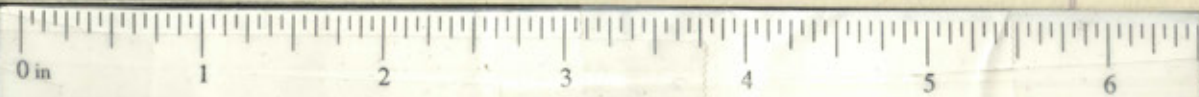

THIS AGREEMENT made this 1st day of July, 1913,
by and between the AMERICAN MUSEUM OF NATURAL HISTORY, as
party of the first part, and MESSRS. DONALD B. MACMILLAN,
W. ELLER KIELAN, FITZBUSH GREEN, MAURICE G. TANNARY,
HARRISON L. HUNT AND THOMAS L. ALLEN, as party of the
second part,

WITNESSETH: that

WHEREAS, the party of the first part, with the
aid of the American Geographical Society, the University
of Illinois, George Bump, Donald B. Macmillan, Fitzbush
Green and sundry other institutions, individuals and firms,
has organized an expedition to the North Polar Regions
which is to sail from New York in the S. S. "Diana" in
July, 1913, for an absence of two or more years of ex-
ploratory and scientific work; and

WHEREAS, the expedition is to be known as "The
Brooker Land Expedition" under the auspices of the American
Museum of Natural History and the American Geographical
Society with the co-operation of the University of Illinois;
and

WHEREAS, the objects of the expedition are
scientific in character and may be briefly summarized as:
(a) the actual visitation, reconnoitering and mapping of
the "Brooker Land" which R. B. Peary reports having seen
in June, 1906, across the ice of the Polar Sea northwest
of Cape Thomas Hubbard, Axel Heiberg Land, and Cape Goltze,
Grant Land; (b) the scientific exploration of the
region between Thayer Bay and Cape Thomas Hubbard; (c) the
scientific exploration and mapping of the regions along
the border of the Polar Sea northward and southward
from Cape Thomas Hubbard at the north end of Axel Heiberg

Island; (d) the attainment of the summit of the Greenland Ice Cap east of Cape York; (e) the collecting of data and specimens along all scientific lines as far as may be practicable; and

WHEREAS, the several objects of the expedition are more fully set forth in a pamphlet entitled "Crocker Land Expedition (George Borup Memorial)" published by the party of the first part under date of 12 May, 1913, which is hereby made a part of this agreement;

It is hereby mutually covenanted and agreed:

FIRST: That the party of the first part will provide an ample equipment of food, clothing, scientific apparatus and other necessary articles required for carrying out the purposes of the expedition.

SECOND: That the party of the first part agrees to provide for the return to New York of the parties of the second part, together with their collections, in the summer season of the year 1915 or 1916, the exact time depending upon advices to be received from the parties of the second part by the party of the first part.

THIRD: That the parties of the second part agree to serve the party of the first part faithfully in respect to the interests and objects of the Crocker Land Expedition as set forth in paragraphs 3 and 4 of the preamble of this agreement, and to make every possible effort to attain those objects.

The pecuniary and other remuneration of the several men called here "the parties of the second part" having been determined by individual agreement with E. O. Hovey acting as Chairman of the Committee in Charge, it is not

Island; (d) the attainment of the summit of the Greenland
Ice Cap east of Cape York; (e) the collecting of data
and specimens along all scientific lines as far as may be

practicable; and

WHEREAS, the several objects of the expedition
are more fully set forth in a pamphlet entitled "Crocker
Land Expedition (George Horup Memorial)" published by the
party of the first part under date of 12 May, 1913, which
is hereby made a part of this agreement;

It is hereby mutually covenanted and agreed:

FIRST: That the party of the first part will
provide an ample equipment of food, clothing, scientific
apparatus and other necessary articles required for carry-
ing out the purposes of the expedition.

SECOND: That the party of the first part agrees
to provide for the return to New York of the parties of
the second part, together with their collections, in the
summer season of the year 1915 or 1916, the exact time
depending upon advice to be received from the parties
of the second part by the party of the first part.

THIRD: That the parties of the second part
agree to serve the party of the first part faithfully
in respect to the interests and objects of the Crocker
Land Expedition as set forth in paragraphs 3 and 4 of
the preamble of this agreement, and to make every possible
effort to attain those objects.

The pecuniary and other remuneration of the several
men called here "the parties of the second part" having
been determined by individual agreement with E. O. Hovey
acting as Chairman of the Committee in Charge, it is not

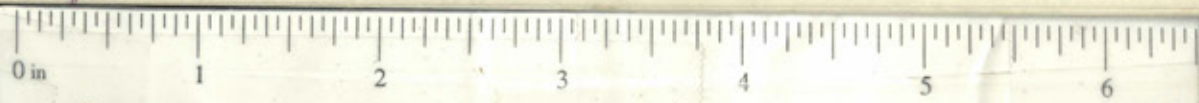

necessary to repeat them here. The manner of payment of the salaries will be arranged by the party of the first part to meet as far as possible the convenience or needs of the parties of the second part, subject to the provisions of articles 6 and 8 d of this agreement.

FOURTH: That in case any member of the expedition fail to reach Crocker Land or in case he or any other member return to civilization or to means of communication with the civilized world ahead of the party, he shall not reveal any of the results of the expedition in advance of the return of the other members of the expedition, or afterward without the written permission of the party of the first part.

FIFTH: That the parties of the second part individually assume all the personal risks pertaining to the expedition and relieve the party of the first part from any and all claims for damages for loss of life or limb or for illness due to any cause whatever, whether accidental or otherwise. A competent surgeon has, however, been included in the personnel of the expedition staff who will render all possible medical and surgical treatment in case of need, without expense or fee other than his regular salary.

SIXTH: That all payment of salary to one of the parties of the second part or his assigns will cease immediately upon his death or complete disability.

SEVENTH: That the party of the first part assumes no responsibility as to the positions or means of livelihood of the parties of the second part after the return of the expedition to New York.

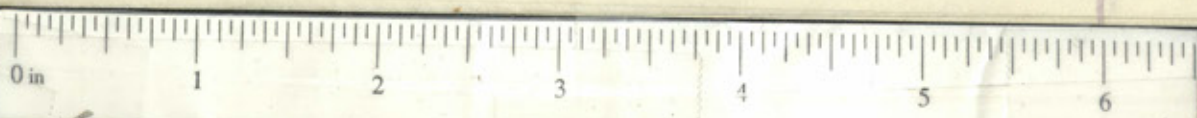

necessary to repeat them here. The manner of payment of the salaries will be arranged by the party of the first part to meet as far as possible the convenience or needs of the parties of the second part, subject to the provisions of articles 6 and 8 of this agreement.

FOURTH: That in case any member of the expedition fails to reach Grockey Land or in case he or any other member returns to civilization or to means of communication with the civilized world ahead of the party, he shall not reveal any of the results of the expedition in advance of the return of the other members of the expedition, or afterward without the written permission of the party of the first part.

FIFTH: That the parties of the second part individually assume all the personal risks pertaining to the expedition and relieve the party of the first part from any and all claims for damages for loss of life or limb or for illness due to any cause whatever, whether accidental or otherwise. A competent surgeon has, however, been included in the personnel of the expedition staff who will render all possible medical and surgical treatment in case of need, without expense or fee other than his regular salary.

SIXTH: That all payment of salary to one of the parties of the second part or his assistants will cease immediately upon his death or complete disability.

SEVENTH: That the party of the first part assumes no responsibility as to the positions or means of livelihood of the parties of the second part after the return of the expedition to New York.

EIGHTH: That the positions of the parties of the second part are as follows: Donald B. Macmillan, leader. Special fields of work: ethnology, practical astronomy, ornithology; W. Elmer Ekblaw, - Special fields of work: geology, botany, ornithology; Fitzhugh Green, - Special fields of work: Cartography, seismology, terrestrial magnetism, wireless telegraphy; Maurice C. Tanguary, - Special fields of work: zoology in all its branches; Harrison J. Hunt, - Special fields of work: Surgery and medicine. Bacteriology; Jerome L. Allen, - Special fields of work: Electricity, wireless telegraphy. It is, however, expressly understood and agreed upon by all the parties of the second part (a) that Donald B. Macmillan is the sole leader of the expedition, (b) that he is responsible for its success from the time of leaving New York to the time of return thereto, (c) that his authority is to be recognized at all times and full obedience accorded to his orders, (d) that insubordination, disobedience or incompetence may be punished by suspension or expulsion from the staff, the salary or salaries of the man or men affected being withheld by the party of the first part during the period designated by the leader of the expedition, (e) that they agree to and abide by the order of precedence of rank which is embodied in a letter of sealed instructions which has been given by the party of the first part to Donald B. Macmillan.

NINTH: That all material of every kind, including all photographic negatives, notebooks, journals and scientific data obtained by the parties of the second part through collecting, purchase, exchange or otherwise while on this expedition shall be the exclusive property of the party of the first part. Except through the party of the first part.

EIGHTH: That the positions of the parties of the second part are as follows: Donald B. MacMillan, leader. Special fields of work: ornithology, practical astronomy, ornithology; W. Elmer Kirby, - Special fields of work: geology, botany, ornithology; Fitzhugh Green, - Special fields of work: cartography, seismology, terrestrial magnetism, wireless telegraphy; Maurice U. Tamm, - Special fields of work: zoology in all its branches; Harrison J. Hunt, - Special fields of work: surgery and medicine. Bacteriology; Jerome L. Allen, - Special fields of work: Electricity, wireless telegraphy. It is, however, expressly understood and agreed upon by all the parties of the second part (a) that Donald B. MacMillan is the sole leader of the expedition, (b) that he is responsible for its success from the time of leaving New York to the time of return thereto, (c) that his authority is to be recognized at all times and all expeditions accorded to his orders, (d) that his administration, discipline and competence may be punished by suspension or expulsion from the staff, the salary or salaries of the men or men affected being withheld by the party of the first part during the period designated by the leader of the expedition, (e) that they agree to and abide by the order of precedence of rank which is embodied in a letter of sealed instructions which has been given by the party of the first part to Donald B. MacMillan.

NINTH: That all material of every kind, including all photographic negatives, notebooks, journals and scientific data obtained by the parties of the second part through collecting, purchase, exchange or otherwise while on this expedition shall be the exclusive property of the

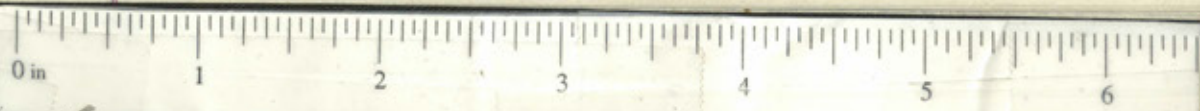

party of the first part. The disposition of this material and the publication of the scientific results obtained shall rest primarily and exclusively with the party of the first part, it being the intention of the party of the first part to favor the members of the expedition in the assignment of the preparation of material and notes for study and publication and to push such preparation and publication as rapidly as may be practicable.

TENTH: That Donald B. MacMillan shall have the exclusive right to prepare and deliver, or publish, such popular accounts, whether in lectures, book form or in magazines, as he chooses, after the first declaration of scientific and other results through the party of the first part. This right or privilege carries with it the use of copies or reproductions of the photographs. The party of the first part assumes no responsibility regarding such popular use of the results of the expedition and claims no part of the pecuniary return therefrom, except as provided in article 12 of this agreement.

ELEVENTH: That in the event of the death of Donald B. MacMillan before the return of the expedition and before he has had reasonable opportunity to take advantage of the rights and privileges mentioned in article 10 of this agreement, all such popular rights as to lectures, books, magazines and photographs revert to and vest in the party of the first part, to be disposed of for the benefit of the estate of said Donald B. MacMillan.

TWELFTH: That the party of the first part reserves the right to dispose of the "newspaper rights" pertaining to the experiences and results of the expedition for the benefit of the enterprise and that the parties of the second part refrain from sending any communication to any newspaper except through the party of the first part.

party of the first part. The disposition of this material and the publication of the scientific results obtained shall rest primarily and exclusively with the party of the first part, it being the intention of the party of the first part to favor the members of the expedition in the statement of the preparation of material and notes for study and publication and to such such preparation and publication as rapidly as may be practicable.

TENTH: That Donald B. MacMillan shall have the exclusive right to prepare and deliver, or publish, such popular accounts, whether in lectures, book form or in magazines, as he chooses, after the first decision of scientific and other results through the party of the first part. This right of privilege carries with it the use of copies or reproductions of the photographs. The party of the first part assumes no responsibility regarding such popular use of the results of the expedition and claims no part of the pecuniary return therefrom, except as provided in article 15 of this agreement.

ELEVENTH: That in the event of the death of Donald B. MacMillan before the return of the expedition and before he has had reasonable opportunity to take advantage of the rights and privileges mentioned in article 10 of this agreement, all such popular rights as to lectures, books, magazines and photographs revert to and vest in the party of the first part, to be disposed of for the benefit of the estate of said Donald B. MacMillan.

TWELFTH: That the party of the first part reserves the right to dispose of the "newspaper rights" pertaining to the experiences and results of the expedition for the benefit of the enterprise and that the parties of the second part refrain from sending any communication to any newspaper except through the party of the first part.

THIRTEENTH: That the parties of the second part,
for value received, hereby give permission to the party
of the first part to use their photographic portraits in
any manner desired for illustrative purposes.

IN WITNESS WHEREOF, the parties hereto have signed
these presents on the day and year first above written.
