— My Laddie —

Oh, my laddie, my laddie,
 I love your very plaidie,
 I love your very bonnet
 With the silver buckle on it,
 I lo'e your collie Harry,
 I lo'e the bent ye carry
 But oh! it's past my power to tell
 How much, how much I lo'e yourself!

Oh, my dearie, my dearie,
 I could bide an' never weary
 At your een sae blue an' laughin';
 That a heart o' stane would saften,
 While your mouth see proud an' curly
 Gars my heart gang tillie-willie;
 But oh! yourself, your very sel,
 I lo'e ten thousand times as well!

Oh, my darlin', my darlin',
 Let's gang amang the carlin,
 Let's loll upon the heather
 A' this bonny, bonny weather;
 Ye shall fauld me in your plaidie,
 My love, my love, my laddie;
 An' close, an' close into your ear
 I'll tell ye how I lo'e ye, dear.

Gray arctic in Arctic

When sun is just going or coming and strong twilight almost daylight. Snow haze and light-clouded sky. Snow on ice pale-grey growing darker in distance to merge imperceptibly with dark gray of haze. Snow-covered land equally gray. Such weather in late Feb. Peleawik and Igloodaham. Ride from " to "

" . Crescent moon high in sky only color anywhere. Still, so still. Gray darkened almost to black by time we got to Igloodaham.

Snow and my back first fall. No shadows, no outlines. Fell into gulches; over snowdrifts against snow covered rocks - no slopes, no hills, nothing but gray.

Moon in arctic.

First year saw no crescent moon. During dark period declination too great.

Second year, glorious crescent showing when so fine a line as thread almost.

Moon in winter

" " summer.

Orange moon through blue haze on south horizon where dark water must lay.

Phosphorescent moonlight playing through sand-blown snow from edge of cliffs.

Moonlight circle about komatik in snow or water haze.
