List of Commissions for Return Journey to America Summer 1916. From Northwest Greenland.

For Mac Millan. —

Will you kindly take charge of mail and cablegrams. If you are going direct to New York, I would advise that you deliver the letters at the American Museum. If not then send them by the quickest route. 11/16/16

Telegraph Miss Krieger from Faroes.
" Mother " ?
" Marie " New York.

For Dr. E. O'Hovey.

"Herewith inclosed I am sending you a cablegram which I wish you to send for me from the first cable station at which the "Hans Egede" may call on her way to Denmark. If there are any misstatements in the message please correct them before you send it. If for any reason you should drop out on the way and Dr. Hunt go on, please ask him to despatch the message, after making any alterations that shall be needed.

"Please take the accompanying package of letters to the Museum and give it to Mr. Sherwood to take care of. If you drop out and Dr. Hunt goes on give it to him for transmission. If you see that both of you are going to fail to catch the first steamer and there is a chance to get it into the regular mail for that boat send it that way. But you will be on the ground and you had better exercise your own judgment as to the best way to handle the commission even to opening the package, and putting letters loose into the regular mail. I am entrusting the package to you or Dr. Hunt as the surest way of getting the letters to America, and for the purpose of having postage prepaid etc.

"Peter has several letters in his possession which I left with him for the mail. Please get them and take them with the rest"

"I am sending to the Captain of the Hans Egede a cablegram which he is to despatch in case neither you nor Dr. Hunt succeeds in catching the

steamer. When you reach the steamer you had better see the captain about this and make sure that he does not send the cable.

Dr. Hovey's advises -

"Countersign drafts of persons from whom you get the actual cash."

"Countersign any bills that you must leave behind you."

"Leave no unpaid bills if you can possibly avoid doing so."

"Pay for everything in cash and get receipts where practicable for expenditures amounting to three dollars ($3) or more"

"Keep an itemized expense acct and submit it to the Museum with what receipts you obtain, as vouchers, when settling your accounts on arrival at New York."

Such has been the patient sufferance of these colonies and such is now the necessity which constrains them to alter their former systems of government. The history of the present king of Great Britain is a history of repeated injuries and usurpations all having in direct object the establishment of an absolute tyranny over these states. To prove this let facts be submitted to a candid world.

When in the course of human events it becomes necessary for one people to dissolve the political bands ~~of~~ which have connected them with another and to assume among the powers of the earth the separate and equal station to which the laws of Nature and of Nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation. We hold these truths to be self-evident that all men are created equal; that they are endowed by their Creator with certain inalienable rights; that among these ~~—~~ life are life, liberty and the pursuit of happiness; that when any form of government be-

comes destructive of these ends it is the right of the people to alter or abolish it and to institute a new government laying its foundations on such principles and organizing its powers in such form as to them shall seem most likely to effect their safety and happiness. Prudence, indeed, will dictate that governments long established should not be changed for light and transient causes, and all experience hath shown that mankind are more disposed to suffer while evils are sufferable than to right themselves by abolishing the forms to which they are accustomed; but when a long train of abuses and usurpations pursuing invariably the same object evinces a design to reduce them under absolute despotism, it is their right, it is their duty to throw off such government and to provide new guards for their future security.
