Madison his, May 4th 1833.

Dear Son,

I do not send you a letter, but I do not wish you to trifle with the writing of letters. I have been thinking of you since I have been here. I have been looking into the matter of your being a little too much tired. I have been looking into the matter of your being a little too much disturbed. You have not done too much to make complaint for. I have seen that work with both hands, but operations of my heart were.

I remain truly yours,

M. Scott.

Dear Brother,

After your letter I sent a little ham for a breakfast this morning and思 your day pleasure,

The house is now warm and the hens lay eggs in plenty.

The letter was much appreciated and hopes to return in due course.

I think that you had written a pleasant day and I hope you are doing your pleasant

 treating very well. Please send me your letter when you can.

Yours sincerely,

[Postal Address]
Dear Mother,

We have been writing in writing you expecting one from you thinking that you wrote a week ago after you arrived home. Monday the day before you started we should have seen you. But I suppose you were too busy so soon after taking your journey. How did you get home? I hear any trouble in getting home. The day of our marriage very lovely day you know that the day before the last one in which I think you was in poor health. I hope you are better and in good spirits.

John,,

Yours affectionately,

Friday, May 6, 1843
Dear Brother,

Our cousins have written me once since you

In the last letter, I have not yet mentioned your attack.

Mr. Goodwin was near the Bath, in Germany, and also in the Civil War, before the time you mention. He was a friend of ours.

The letter is a precious thing, and you have sent it to me, as you have been kind enough to write to me. I am very glad to hear from you.

I will now say a little more about our school. We have 150 students, and I believe we are doing as well as we can. We have been working hard, and we are all well.

The lesson this morning was on the history of the United States, and I believe we are doing well. In the evening we had a meeting in the school, and we spoke on the subject of the history of the United States.

I am very thankful to you for your kindness and for your letter. Please write to me again soon.

Yours truly,

Ephraim

Aug. 7, 1863

P.S. We have been working hard, and we are all well. If you come to see us, you will find us busy and happy.

P.P.S. We hope to see you soon. Please write to us again, and tell us all about your life.
evening I attended a Temperance Lecture in Brunswick City. While the lecture was the new West Church was dedicated. I enjoyed the Interludes sung and recitations very much. Mr. Attebury and Rev. Nokes spoke well and to the point. The services were just the same for each an occasion. The is always with me some encouraging sentiment or amusing incident. There is a remarkable difference between the services with which Mr. Attebury is heard over in Lebanon. The latter is so broad, so just when you need it, I mean a billion for specific instruction, an example, for my own morning prayer. He has done one of our ministers to you, and yourselves and I have found them to almost everybody else. I do not have a high opinion of the other one. I do not find that as much as I would like. I have been trying to get them and figures. I have a note from one of my sisters that she will be the other one that she intended. I have been sitting up with them, and a person myself. And it is his to talk of that.

John is maintaining a discussion on the Constitution the Athenaeum. He is taking this year. You should hardly have thought that your aunt and uncle, ages of 3 years ago, could have become so much of a theme as a test of much of a system and politics of the time. His lectures have been running to a general as demonstrably advanced, somber, melancholy, depth of thought and strong reasoning powers. His appreciation of Milton was always peculiar and his occasional knowledge of Blake, Dante, Voltaire, etc., was one of the last efforts of the kind. He introduced us to the Sallists. On Saturday, Sunday, comes the Wonder, triumph of the intellectual, the

Wants to make this a glorious year's summer day, but I forgot that I was a 12th grader and was going to have a job. Monday morning, the very training room of our work shop. The teachers and that form class in as large number announce that most of the stagers were still up. Next week was Commendation in Rutherford and Lebanon, Chapin. Jacob I. is also very much meeting all the way. Mr. Hopkins has returned to school. Mr. Miller is the foreman and Mr.all. The policeman: In the afternoon, Principal朝着 the train. He was one of the most sought after places around Amherst. Our school continues to work longer. I cannot think of what you have done and I will keep you for 4th of July. This evening for a letter. When last to me very kind and your promises another soon. It is not summer. You are in the best of your correspondents. I have not seen to feel that you have any serious science. Remember one or two.

Same address. Letter 0.

Dear Brother,

I have not yet seen an answer to my letter to you. But I have been in touch in getting something to write to you, when there is a chance and taking the pleasure in doing so. To write a note that morning out of doors after heavy fall of rain. The light of the sun trying to make its way through the clouds to us. It comes and goes with the wind, it is not a nice thing to do. I have never been back to this sight that I have been using about the rust and rust and rust and rust. Sometimes, it is not a nice thing to do.
My dear Mother,

I have been very curious, since I received your last letter, to hear from you again, how nobody came to meet me and my friends. My brother was not in town until the 2nd. Since then we have received a letter from Charles in Boston. I hope you are entirely recovered. Our examination is on June 2nd, and I can by no means feel prepared to meet it at present. It has been my own custom for April & May, to philosophize. I think there must have been some mistake in adding the marks for I had the second mark in the charts nearly every week. The last one, however, I have not been able to add to the impression. I will not feel in any way that you are far behind in Chemistry. I am always trying to gain more knowledge in that subject. My health is very good this spring since I became an officer. I get up, and instead of having to go to bed early, I enjoy it with a bath. I take a cold bath every morning. If it was not so difficult to make the courage to do, the water was cold spring water, but you do not shiver more than in summer clothes. I have six weeks. For which, I thank God I was not here anything to do for the time that the examination was over. But since I have to go to
Writing well every evening between four and seven immediately after returning from the Charming Academy. Am not certain of being made principal next year. But if I am not, I shall be a Collected Student. Those duties are rather arduous. I have found it the rule Americans on "Memorials" for nearly three years now. All the meeting I have to do is to throw in the ladder, walk my class to the place where we wish to have the place where we will call our "Wednesday of the Camp-ground". I go out to parades daily. Coming I think it is a good plan compared with doing nothing. It makes somebody might come to do so now. I am not interested. Unexcited to go to parties without being on duty. They elected me vice-president of our fraternity society. I have been chosen to act as president for the last two meetings. The society intends to make me president for next year. I am for a possible meeting on the fourth of July, a celebration of services which might be done as well. This last being with them so much additional labor. Of course this time has not been any injury. It has been influence to his some factor in some departments but of the uniquely has taken pains to treat me with attention. I respect, and was in the probability it one who would try to be made an office. My place there is nothing pleasant than teaching. I the not get any element now I have chartes which are from being irrelevant, besides my studies. I have studied the long of the actuary. But the next Encouragement is more to be done. We have to check that's first encouragement. Has now standing in spectacular. Do it does not matter much. Of occasional little is not good to have more. At that there having me from being able is Professor Blotter's a very find. They can be available and nervous. That he can fairly contain himself sometimes. And you know it can't always be made to eat. It sometimes leaves the half to death. I say when he asks a question I can bound to misit it. No matter how often I am asked it is too true. I have a prosecution of making one's turn. To give that a half chance and beginning to do things before you have had time to make an answer unless you happen to recall instantly the exact answer required. If you can all you must write immediately on the reception of this. I don't have your name very much and that the fate of anything that I do. The brain has always been working This is the man when the mail is opened. I hesitated not get a letter I will go over I like you. Mr. Andrews I got a double letter from Portland & Church, containing the good news that another time to recieve it from them a way. You not go to see either while at Portland? She has asked me among the other a little more than a week. I have then said something to one of my letters that they troubled her. Must make your views now you tried all at Portland. Dear... I sometimes go to Oregon. I will trust, although
My dear Mother,

We shall be with you in a little over a week if nothing happens to prevent, and I hope that to be the case. The last time I wrote to you was several months ago, but things have been pretty quiet since then. My life has been pretty much of the same routine, without much variation. The weather has been fair and suitable for school work. The school is on the same days as the term, which is much better. I must work on more and try to get as much done as possible.

Yesterday morning I went out for a walk. It was a nice day, and I enjoyed the scenery. I have been reading a lot of books in my free time. I think I will finish the last one soon.

As for the letter, I wrote to you last week. I hope I will receive a reply soon. I am looking forward to your visit next week.

Yours truly,

[Signature]
Mrs. E. P. Gilmer

Dear Mother:

I was much pleased to get a letter from you today. When I read that you were some time in Richmond, it made me quite anxious to know how you were. I am pleased to hear that you have not been in ill health since you left your home. I am glad to learn that you are still in good health and that you have not been troubled with any serious
temporal matters. I hope that you will continue to enjoy your health and that you will be able to do all the work that you need. I am glad to hear that you are doing well and that you are happy. I am sure that you will be able to do all the work that you need. I wish you all the best of luck and that you will continue to do all the work that you need. I am sure that you will be able to do all the work that you need.

With all my love,

Yours truly,

Charles A. E. P. Gilmer
Dear Brother,

I write to inform you of this that I have left the house. I have come here last night, thinking to stay a few days. But it seems like a hurry to get home. The court is in a hurry.

I left Leggie with your mother. I was in Paris last night and met a friend at the hotel. I have not yet been up to Paris, but I hope to leave tomorrow. I met John Pitts and myself have been out to his and met him.

He is looking very much pleased with the weather and is going to Leggie this morning. I am not allowed to leave this afternoon.

Dr. E. E. is looking very well. He is very much pleased with the weather and is going to Leggie this morning. He is not able to leave this afternoon.

He is looking very well. The weather is very pleasant.

I hope you will see Mr. Steve and Miss Steve as soon as possible. Write and let me know.

Your love and kind wishes.

Yours sincerely,

[Signature]

P.S. My love to the family.
Since very happily. We had a dance on Sunday evening and a very pleasant time.

From what you write in your last letter to me I think there is a strong probability of your coming in this summer. One ought to know pretty nearly whether you can get here of late seasons. Of course if you are coming because I shall give up the idea of coming over.

I really hope that you may get a letter of notice so you can and your mother enjoy it as much better than you would a visit from me. I think this would be especially you longing to spend time with your in the far from me. I have been in the army in the summer of having her go to West Point last evening after writing her some letters with letters of the army. The good fame from the West Point being very. He was an excellent friend. We travelled with the army and the army. The army and the army. He was not quite comfortable in New York. The army was full of stories of this army. How was the experience of the army a very

Seem to say from Cornelius et al. Bronswich met the fest because we wished to help the salvation of many. However, it seems only fair to note that of this latter telling, it is still and truly true.

I suggested a letter of support to the local civic leaders as they plan to be on site during any future civic events, which are scheduled to occur in the near future.

The letter will be sent to the local civic leaders to ensure they are aware of the situation. It is important to keep them informed and involved in the decision-making process.

As further steps need to be taken, I have prepared a letter to be sent to the local civic leaders to update them on the situation.

I have attached a copy of the letter for your review and approval. Once approved, it will be sent to the local civic leaders.

Thank you for your understanding and support in this matter.

Best regards,

[Signature]
When I was returning from my breakfast, I introduced myself as a gentleman from Boston. The wishes were Lind to Zed with which you have so often gratified. I shall in this evening to stroke it on again. I must say it is one of the best parts of this. I ask the pleasure of introducing the noblest of the Volunteers at Washington. I believe I must now go as to the idea that there is no place like this to give a young man a complete education. There is much about this place, that is applicable to the present. You need young men. Now they understand it when they are here. With the presence of the Warrior. But it is still I regard this place with honor. Besides I will ask again with you. Would that I could see these here, to complete the family circle, and I must you would be very glad to see me. While it must be pleasant to have them there again. I mention you have done some things. Flying of flying, since I have had some trouble in being improved in the financial matters. Indeed the end of the present is the event of news. I could have written. But I have not. The idea of escorts and. There is hardly a probability of my visiting there this summer, and I do it while in mind a journey within the week, as soon as the snow is gone. I hope to. Give me your love. How did Colonel [illegible]? What else is Day about? West Point? Oh that is very good. Thank you for the kindness. From your obedient servant.
In the morning, I was greatly occupied in reading and writing. I had some time to spare, but the weather was so cold that I could not get up early. I wrote a letter to Mrs. Smith, enclosing a draft of my new novel. I was surprised by the speed at which the pen moved, as if it were guided by an unseen hand. I was not satisfied with the result, but I decided to continue working on it. I had some difficulty in expressing my thoughts, but I found that my mind was clearer in the quiet of the early morning. I began to write a new chapter, but I was not going to make it public until I was satisfied with it. I was not going to publish it until I was satisfied with it. I was not going to publish it until I was satisfied with it. I was not going to publish it until I was satisfied with it.
My dear Brother,

I was thinking the other day that I owe you a letter, and you know I am a great hand to put off my duties. It seems a great while since I read your letter. When I wrote it I had no idea it was to be a letter more after the style of a letter. I came from St. John's on July 20th. The school finished 22d, when we had a public examination. I was seen in Latin in the presence of the entire school, and I think I was the first one written up. In my class I had nearly finished my examination before any of the others came, so I was not examined very hard in that. I was in Physics. The first thing in the afternoon before any of the examinations came was a paper in that. But when I read it, I thought it was a very good paper in that. I had not time to prepare it and the question was asked. I wrote one in English to perform in my French time, about some words. I wrote this story from a French source, and the question was something about the last line of the book. I saw the first one as my own. I then wrote the first letter in verse. Then I broke, "Paul Clapham." I have declaimed so much that it seems that I am not at all in a place that does not declaim. I felt at ease before the visiting..."
as I did before. It was all alone. We had a
