Major Gen. D.H. Howard

M. W. Schofield

Requested me to forward your Lithographic Paper & Ink I have sent you a large sheet which you can cut to any size you may require. Note, letter size &c.

In the first place please keep your hands off the yellow side of the paper put a piece of paper under your hands then take a rule and rule the lines as wide or as close as you choose with a lead pencil on the yellow side of the paper, then take and shake the White bite. The Lithographic Ink I had prepared...
Take a clean pen or if you have a new one it will be better to take it. Take out on the point of the pen a little ink and try it on a corner of the page. Be sure to try your pen every time you take ink on the point of the pen and be sure to let no other ink come near the ink pen or paper or it will destroy the same and write on the yellow side of the paper and when you find it please put a piece of treasure paper on the back of it to it write and rub off that and the amount you have written it please forward it to me.

Yours very Most Respectfully

Dear Sir,

With great pleasure I learn the abundant success of your praiseworthy enterprise in laboring and giving to the enterprise of saving the Colored—brother.

I send you a small token again, and little as it is, it makes my heart bigger. I hope the Great Being will continue to smile on your efforts; I know the Lord hath made the seed bring forth even more abundantly than your highest expectation.

I hope you will honor me with the pleasure of receiving my small gift occasionally.

From,

Yours Truly,

My Dear General,

I left home the day after our
Anniversary, I have been
absent a month, so I should
have before explained to
you why I could not do
more in the way of compli-
cance with your request
in the paper handed
me by my good friend Gen
Whittlesey, just before that
Meeting. The facts were these.
The matter was deferred
in the Meeting of the Town,
at which arrangements
for our Anniversary were
made. &

May Gen Howard
agreed that as the above
meeting was given to the
Washington Church last
year & Union had made
a liberal loan & still
further, Dr. Morris' Church
had made a large sub-
scription the last year
to you which prevented
their giving to the Union
any thing, she could
not do any thing fur-
ther as a society without
seeming to other Church,
who were urging their
Claims on us, to be given
similar to the Ch. at
Washington. This had
been the decision of the
board. I felt that I had
no power to change the
Programme of the evening
I, therefore, did the best
I could to make it
My preliminary statement that Richs was sufficient to let the public know that they would still be called upon.

We are struggling on in our great work—very numerous urgent calls for aid & only moderate contributions, still we have hold on the public mind a little. I have just been looking over the West & never fell more profoundly in love with my country. Oh that Christ may have stood it! To all best wishes.

For the church in Washington.
Sam, ever near Samuel, ben faith fully yours.

States that he left home the day after their Anniversary and has been absent a month or so. He should have explained before why he could not return in compliance with Genl. Howard's request in the proper list. The proper list to him by Genl. Whittlesey. Makes an explanation at length stating the nature of other claims that are being made upon them.

My Dear Sir,

I am reply to the note just received. I will say in a word that I am glad to do it that each of the churches in Lowell is asked for a contribution in aid of the church in Washington. There are five of them, and I think we will make it more than $100.

Yours very faithfully,

Moran James.

Dear General,

I did not pronounce "the building block" a failure although what I did say might have very readily led to that conclusion.

In conversation with a gentleman the other day he made a remark that led me to think he was acquainted with the material and I questioned him about it and he pronounced it a failure remarking that he had tried it and about the third year the post made it crumble so that it was worthless.

I asked him how it was made and he said of sand and cement. I then told him of our enterprise and
He replied that we would find that we had made a mistake. This is the only conversation I think I have had with anyone except to mention the need to Dr. Nichols with the additional remark that I had tried the sand and cement and it did not stand fast. I do not know what the building brick is made of but have been informed that it was sand and cement and if so I think the experimenter a doubtful one.

This is the only view I have and that is almost or quite worthless.

Respectfully yours,

O. P. Loomis
