Hon. F. B. Sanborn:-

Very much has been said about our American poetical genius Edgar Allan Poe long since deceased and the stories are very contradictory. Some say, he was subject to dissipation and died of delirium tremens while others deny it. His physician, J. J. Moran, M.D. in his last illness in the Washington College University Hospital in Baltimore says; "He did not die under the influence of any kind of intoxicating drink." See "Boston Home Journal" March 11/1882.

He was a total abstainer from 1841 to 1849 and was drugged and robbed even to his clothes before he was taken to the hospital where he died.

Having been a cadet at

Having been a cadet at

cashiered on March 6, 1831 for  
neglect of duties and drunken-

obliged if you would copy the  
official record in brief re-

you and forward by return

Dear Sir:

My class has  
begun the study of the  
late Civil War.

In that struggle for  
national existence, you  
well illustrated loyalty  
to country and loyalty  
to God.

I wish to inspire my  
pupils with these two  
ideas, and with gratitude

to those who saved  
the country.

As a means to this  
end, permit me to ask  
a few lines from you,

Dear Sir,

I have received  
no answer to the letter I wrote you  
last February. I am sorry that I am  
so constantly importuning you for help.  
my getting out of this place will in a  
measure depend upon my getting a certificate  
from you certifying that I served with  
you during the Big Bercees and Blackfoot  
Indian Wars, on the 7<sup>th</sup> day of July on  
Clear Water we captured a Squaw. I cite  
this circumstance merely to call your  
mind to the time so you may possibly  
remember me, which I am afraid  
may be more difficult than I imagine.  
In the evening the Squaw was sitting in front  
of our tent, you sent for James Reubens  
and myself and we took her to our

Camp. during the Papuack War. I carried  
to you a note from the Quartermaster  
of our command. I delivered it to you  
on the Walloga Hill. I left Steamboat  
landing on that morning and overtook  
you. you must certainly remember the  
circumstance if you would send me a written  
certificate acknowledging the above mentioned  
the Governor when he was over here  
mentioned that fact. and if I could get  
from you a certificate he would favorably  
consider my case. I am suffering from  
Lung disease. and have at Best a short  
hold on life. I have now been in confinement  
two years and four months. if you would  
write to General Wheaton. he would very  
well remember me. I went to Spokane with  
General Wheaton and Col Watkins

Dear Gen Howard,

I recd  
an enclosed letter from you  
containing an enquiry for the  
kind of my brother Warren  
intimating that there was  
something due on his pay  
while in the Army.  
If so I suppose you know  
all about it. You served  
in the Volunteers the same as  
he did and entered the Regular  
Army again the same the only  
difference being that you resigned  
I believe from the Regulars and  
he did not.

If you can give me any  
information concerning the matter  
it would be thankfully received  
I thought that there might

be something in it as the  
Pension Agents seem to be  
making the enquiry,  
and can you tell me if  
they are reliable men whose  
prospects you dont see

We were very much  
disappointed that your wife  
did not come to see us where  
she was here last fall  
If James or Chancy come this  
way next summer we should  
be very happy to see them

Warren died Oct 31 1866  
you can probably tell  
me how much if any thing  
is due under the recent construct-

or two years as he might desire.

I send you by this same <sup>mail</sup> one of its programmes, giving object, conditions of admission, and, course of study.

I think you will find an English version of this programme in "Barnard's Technical Education in Europe" of which a copy is, I believe, to be found in the U.S. M. A. library.

The French, spoken in Lausanne, is very good indeed, and I know of no pleasanter situation for a year's residence. If you should think of sending your son to that city, I can warmly recommend you to place him under the charge of a Mr. G. Olivier de Spey<sup>r</sup>, who is the head of an institution for

14 April 1882

Maj. Genl. O. S. Howard

Superintendent U.S. M. A. Academy

West Point, N.Y.

Dear Sir;

I must apologise for not having sooner answered your letter of the 30<sup>th</sup> of January, which reached me in London towards the last of February.

The delay is not entirely my fault, but is due a little to sickness, a little to delay in my getting some information sought for, and a little to my being at the present moment obliged to attempt

to do twice the work I have  
time for.

The best polytechnic education  
to be got in any French speaking  
European country is at the  
Ecole des Arts et Metiers in Paris.  
However this school requires the  
pupil to give up three years  
to its course of study, and  
moreover to be conversant with  
French before entering. Besides  
all this it would require his  
constant residence in Paris, which  
you object to.

The next best school is at  
Zurich (Zurich Polytechnic School)  
where the scholar can remain  
as many or as few years as he  
likes, but where he ought to  
know both French and German

at entrance. It would just about cover  
all expenses of teaching and  
living in either Paris or Zurich  
if properly spent.

Geneva would be in my opinion,  
as objectionable as Paris for  
your son's residence. Besides  
there is no first class  
polytechnic school there.

Lausanne, in Switzerland, on  
Lake Geneva, might serve  
your purpose very well. The  
atmosphere of the place is  
very clear morally as well  
as meteorologically. There is  
a very fair technical school  
there (Academie de Lausanne)  
where your son could follow  
the course of study for one

you can do better than send  
him to Lausanne for his  
first year etc etc

As regards instruction in Civil  
and Mechanical Engineering, it  
is taught better at the Mass.  
Institute of Technology, and the  
Imperial Polytechnic schools, than  
at any place in Europe except  
Paris (Ecole des Arts et Metiers, &  
Ecole des Ponts et Chaux, both  
three years courses).

As to printed matter on the  
subject of Technical schools  
abroad; I have been on the  
look-out for such literature  
during all my stay in Europe  
and I can assure you that  
for accuracy, completeness, combined  
with conciseness, and general  
usefulness, there is no work

167  
any more recent in Lausanne.  
I met Mr. de Speyr last  
summer while he was travelling  
in Switzerland with his  
pupils; the latter were  
all very gentlemenly in  
their manner, and I was  
very favorably impressed  
by both himself and them.  
In fact, the first condition he  
requires of his pupils is that  
they shall be gentlemen.  
Most of the scholars are  
under 18 years of age; still  
if your son should desire  
to go there he would be treated  
by Mr de Speyr more as a  
fellow-student than as a  
pupil; and he would not

be subjected to the same rules  
of the house as the younger  
and less responsible members.  
Mr de Spiez's house is  
on the high ground above  
the lake, is comfortable  
and healthy (so he says).  
I send you a photograph of  
it in the Lausanne's Academy's  
programme.  
His terms, including board,  
lodging, washing, French,  
German, Italian, Greek, Latin,  
Mathematics, Mathematical  
Drawing, &c in his classes  
is in all \$530. a year.  
The tuition at the Academy  
of Lausanne costs about  
\$40. a year. studie  
Your son could select his

14  
according to his choice, partly  
under Mr de Spiez's, and  
partly at the Academy's.  
Mr de Spiez is in the habit  
of spending three or four  
weeks every summer walking  
through the mountain region  
of Switzerland and he  
takes his scholars (those who  
so desire) with him, thus  
enabling them to get air,  
exercise & fine scenery at a  
minimum of expense.  
If you wish fresh air, a  
healthy location, pleasant  
and good surroundings, a good  
advised, a good chance to  
learn French, German & Italian,  
combined with an outlook  
into Civil & Mechanical  
Engineering, I don't believe
