Gen O. C. Howard

Dear Sir:

Being informed that a plan is contemplated which may lead to the development of a new water supply and the possibility of a construction company being organized soon, I take the liberty of respectfully asking if a copy of the latest military map such as will show the Topographical and Hydrographical surveys within a Radii of 50 miles of San Francisco could be furnished me.

Hoping General that I am not asking of you too much, and for which I may yet render some service for your kindness,

I would respectfully
Desire to remain

My dear General:

I am obliged by your favor of the 14th current in reply to my letter of inquiry bearing date of Oct. 26th. I have made an engagement to meet Genl Ballock next Tuesday evening when I hope to explain to him the nature of the work I am doing: and to request him to elucidate some portion of his record as Disbursing Officer of the Bureau which is not exactly clear to my mind; and also request the loan of the volumes sighted in your letter.

I have before me a letter from Adjutant Genl Drum, of the 10th current in which he offers to open to me the Records of the Freedman's Bureau; and, being acquainted with the Secretary of War, who is from my State, (Mass.) I apprehend no serious obstruction in this direction; but should it come I shall have the Massachusetts Senators urge the necessity of the record being opened to my inspection.

more than any other living man
upon this continent to rescue the
South from anarchy and to lay the
foundation, broad and sure, of the fu-
ture of the Negro Race, are the de-
sires nearest my heart as a Historian
So you can see, my dear general,
that I ought to have at least a week's
talk with you in which I could lead
just in logical order along the lines I desire you
you, to throw light upon; I could
bring you out so that you would
inspire me to write a great work.

I am ambitious to make this sub-
stantially the History of our country
for the twenty years it embraces, — 1865
to 1885. I will give you the merest
outline of my work. Title: A
History of the Reconstruction of the Late
Insurrectionary States, 1865-1885. Part I,
The Ante Bellum View, — in which I con-
trast the two sections of our country,
— after a brief review of the establish-
ment of slavery upon this continent and
its influence upon the Constitution and
growth of the nation, — together with the
number of acres of land under culti-
vation

I have read carefully every line of Senate Executive Document No. 27, 39th Cong. 1st Sess., which was transmitted by President Johnson to the Senate Mch. 5, 1866; also House Miss. Doc. 87, 42 Cong. 3rd Sess., being your communication in reference to the Late Bureau &c. I have read the reports of Mr. Alvord on the educational feature of the Bureau; - in fact I have read every single report of the Assistant Commissions, and I send you a copy of my list of documents covering this branch of my historical investigation: Senate Ex. Doc. 4 - 39th Cong. 2nd Sess., Senate Ex. Doc. 1 - 40th Cong. 1st Sess., House Ex. Doc. 142, 41st Cong. 2nd Sess., House Rep. 120 - 41st Cong. 2nd Sess., House Rep. 121 - 41st Cong. 2nd Sess. and House Miss. Doc. 87 - 42nd Cong. 3rd Sess.

But these are merely dry bones of history, and now to put the flesh and blood of philosophy upon them; to handle them with judicial candor and power of literary expression, to separate error from truth; to show the malevolence and irascible spirit of party slander; and put myself outside of partisan fervor or the tendency to racial panegyric.

vation, agriculture, including rice, tobacco, sugar, and hemp; live-stock, manufactories, tonnage, railways, banks, newspapers, amount of money spent for home and foreign missions, condition of penitentiary and eleemosynary institutions, character of municipal government, valuation of property of both sections, the number of fighting men from 18 to 45, the number of males in excess of females, the geographical distribution of emigrants, the death rate according to density of population, the basis of Southern and Northern representation in Congress, the valuation of real and personal property in the North and South, including slaves, and in every thing showing that the North had the advantage of the South on account of its system of free and compensated labor. Part II. Provisional Military Governments; - first, a description of the surrender of the Army of Northern Virginia to Gen. the amount of the Confederate Debt.
Next a description of the Assassination
of President Lincoln; and a Sketch of
Andrew Johnson and his conflict
with the Secretary of War, and his

with the measures of reconstruction
beginning with those that passed in
1864 and coming down to Sherman's
order, issued from Savannah Jan. 16-1865.
Then a Bill for the Creation of the
Freedman's Bureau, the Proclama-
tion of President Lincoln respecting
the admission of Arkansas and
Louisiana. Then comes a descrip-
tion of the lamentable and impover-
ished condition of the South, the dis-
tress among all classes of people,
and the magnanimous feeling of the
North as manifested in the Bureau
for Refugees, Freedmen and Abandoned
Lands. I examine the difficulty

Now, my dear general, I hope you will regard this letter as private and confidential. It would give me great pleasure to make a trip to San Francisco to see you, because the whole question of this work is largely bound up in the Freedman's Bureau; and to see you and be with you for some time would be of very great value. I assure you, but I do not see how I can afford the expense of the trip at this time. It is not long since I came back from a trip of the entire continent of Europe, and I feel a great deal like staying at home; however, if a way should open up I will endeavor to come in Dec. or Jan. What is the price of a ticket to San Francisco and return?

I have just delivered an oration on the Emancipation of the Slaves of Cuba, a copy of which I will forward to you next week. With sincere respect, I am,

My Dear Genl.

My health continuing to fail in this altitude
I was compelled to apply (through the regular
military channels) for a change of station

I wish not only to reach a
lower altitude but a more bracing atmosphere
I can find a lower altitude in this
department but there the heat of summer
will be oppressive and I am satisfied
I could not stand it.

I have information that there
is a vacancy at Alcatraz, and I think
if you will consent to appoint me

to that station perhaps the Secy of War
will transfer me to the Department of
California.

As a Methodist Minister I have
done considerable mission work among
the lonely and think I should be
pleased to devote my time in
ministering to the prisoners.

I trust you would be so
kind as to inform me whether
you could assign me to Alcatraz
or to some other Fort on or near
the Coast of S. I should be transferred
to that Department.

As my health is at
stake and I think the sea-breeze
would benefit me I trust you
may be able to comply with my
request. Wishing you will always

May, 1st application to the Assistant

I was never favored with a reply.

Gen. G. O. Howard,
Presidio, San Francisco, Calif.,

Dear Sir:-

Referring to our conversation yesterday in which you requested me to endeavor to get, somewhere between San Diego and National City and one mile to one mile and a half back from the bay, an eligible site for the location of barracks in exchange for which, with a supply of pure water, I am to get the two blocks owned by the Government in New San Diego; I thought it well to place on record my intended plans, so that in the future there can be no question as to the motives.

I propose to secure three of the most disinterested and reliable real estate dealers and request them, without their knowing what the proposition is for, to place an estimate on the two blocks of the Government land. I then propose to take that amount, or nearly so, and invest it in land in the locality you suggested and in the laying down of water pipes from our present terminus to that locality. In my estimate of the water pipe I shall figure, on a good, large sized, cast-iron pipe, most of the way, so that you can get full pressure and a free flow. It may be months before I can complete arrangements

 material in the transaction, for there will be the risk run
