1228.

Sir Recognizing that all people belong to their Creator and that Governments are His ministers I think it my duty to contribute this mite of labor toward their conservation. Whilst studying up means of obtaining peace by art I detected these physical destructions which are now pending to the world and its inhabitants. First The waters which should exert equal pressure on the earths crust have been allowed to accumulate as great mountains of ice round the poles and there exerting hydrostatic and hydraulic forces bare tending to explode the planet which would be followed by its conflagration the waters being resolved into their elements and ignitable fulfilling 2nd Peter III. Holy Scripture. The recurring earthquakes are premonitory physical signs and symptoms of this catastrophe and are foretold Ezekiel xxxviii. 18 to 23. All the self luminous planets and suns are in conflagration. Second: The yearly accumulation and melting of some of the ice around the poles is sufficient to unbalance the earth on its axis causing its gyratory motion and the recession of the Equinoxes which has lengthened the year about 160th part (the Christian year being but 360 days Revelation XI. 2. 3) allowing the solar heat to have a correspondingly increased effect producing malaria yellow fever cholera &c. Third: The slower the motion the greater the attraction of gravitation, and as there are sundry systems of meteors having orbits round the sun near to the earths she is gradually coming within their attraction and if this be allowed to continue they may come down in sufficient quantity to bury the present surface with all its inhabitants so many thousand miles beneath the new as the Almighty only knows fulfilling Daniel ix. 27. Importance of this Epoch: The times of the gentiles are fulfilled Luke xii. 24. Daniel viii. 13, 14. Revelations xi. 2, 3. Forty and two months 1260 days. From the time the Romans destroyed Gods Holy Temple Daniel ix. 26. and set up the abomination of desolation B.P.Q.R. in A.D. 70 Jerusalem was trodden down of pagans until Constantine a professing Christian became sole Emperor A.D. 325. From this until A.D. 637 when captured by the Saracens Jerusalem remained under Christian sway except from A.D. 614 when taken by Chosroes the Persian until A.D. 628 when retaken by Heraclius then: 42 mos Revelation xi. 2, 3.

A.D. 1872 End of Franco German war also with death and hell the
Dragon false prophet and beast. Again Daniel VIII. 13. 14. XIX 27. B.C.
300 yrs the midst of the week of days with the Lord. Antiochus set up the statue
of Jupiter in Gods Holy Temple. 2300 yrs from then if Solar would be A.D. 2000
If Mosaic (354's days each) would be A.D. 1931 But Matthew XXIV. 22. "He hath
shortened the days" the 6000 Mosaic years expired A.D. 1821. But Daniel

VII. 27. "All dominions shall serve and obey God. They the Lords Kingdom fills the whole
Earth and in it the Law of Equity given through Moses is Supreme. Christ and His Apost-
les only relieving from the Sacrificial and Ceremonial Law. Then every creature under
heaven should obey the Royal Law "Do to others as you would others should do to you"

Having drawn attention to the above I will now explain the discovery I made (in the hands
of Divine Providence) which if generally applied will arrest the destruction and D.V. can
serve the Planet with all its inhabitants. It is to obtain rain by art and even a river
from the Atmosphere where required in the torrid or temperate zones. So that the desert
lands and in times the solar regions may be opened up for settlement. Every ounce of water
taken from the atmosphere by art is an ounce of ice and its amount of cold removed
from around the pole. In order to conserve the planet and the lives of its inhabit-
ants the people should be settled on the lands so as to equalize the pressure
on the earths crust. If any man have more land than Joshua at the Divine

Command gave each a dult he has his neighbours property no matter how much
money he paid for it, or what acts of parliaments or decrees of clergy may be pleaded
Contrary!

That this work is in harmony with Divine Revelation and in Gods
Service. We read God created all things in six days and rested on the seventh.

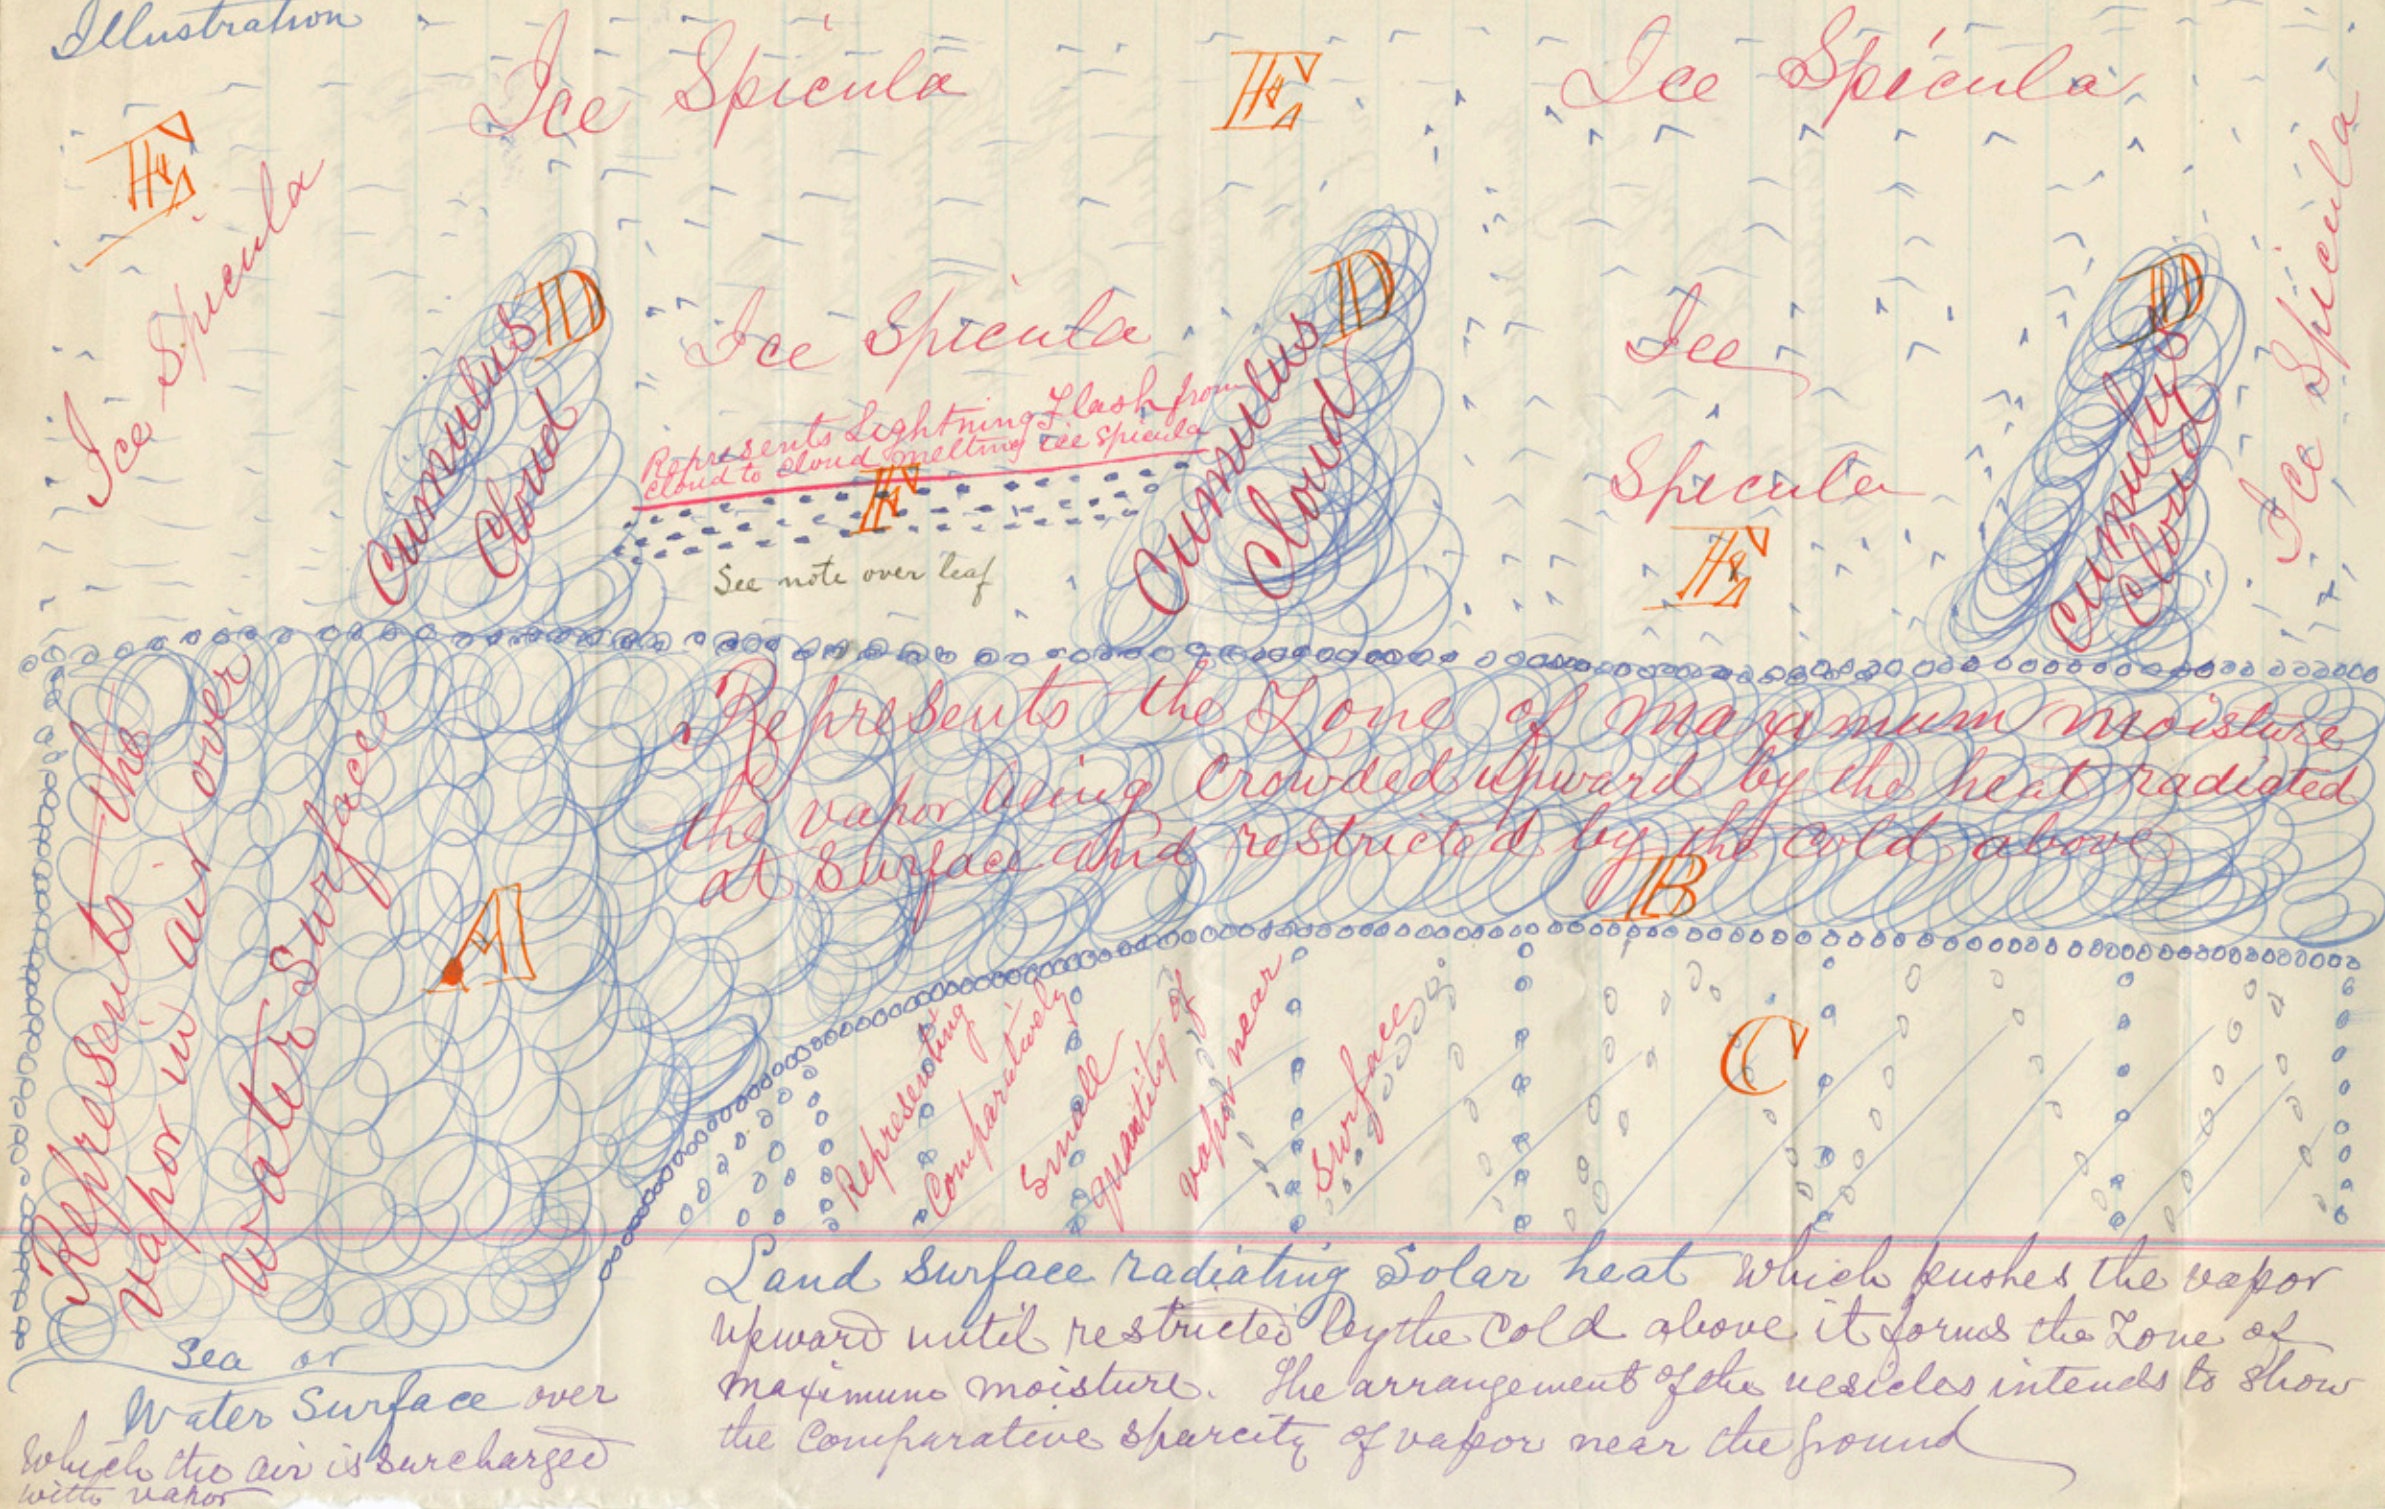

We are now in the 7000 Mosaic year. Rain by lightning and thunder is an extra-
ordinary labor imposed on God by Adams fall; viz. Flesh was not given to man
originally as an article of diet. Slaughtering of animals leaves a void in nature
Streams of negative electricity should be given off from the points of hairs of animals
which attacking the positively electrified vapor vesicles would neutralize
some of them allowing them to coalesce and fall from gravity in silent streams
of rain from the zone of maximum moisture without the anger of Jove manifest-
ed by thunder.

I only applied for a patent within the United States. I ask
that all Governments adopting the methods I explain will
endow so long as the planet continues widows and orphans
homes to be conducted and the orphans to be educated
in the manner I will indicate from the light of
Holy Scripture. Where the Governments can afford it and
the territory is extensive enough I desire that such
a home be established and maintained in each
State province or Colony.

1 Dec. 1886. Grinnell
Iowa

My dear Gen. Howard:

You are aware of the long continued effort to
switch the American Board off upon a future
probation track, and of the check given to it by
an action at Des Moines. You may not have not-
iced that those who were defeated in the battle (I
use military terms, because in uniting to a soldier)
are now trying to reverse the result by crowding
the Prudential Committee into calling councils in
certain cases right away. We gave the Com. no au-
thority to do it at all - merely recommended that they
should "consider the Expediency" of doing so, to prevent
its being done before the Board had considered the
matter (it being brought up at the very close of an meeting)
I moved an amendment requiring the Prud. Com. to
report next year the result of their "consideration".
This carried the resolution, and ^{manifestly} postponed the main
question of a new fangled sort of councils, unknown
Congregationalism. This something like it was for
past ten years (1872-1877) tried by the Committee.

is abandoned as a measure, to the meeting next year.
But if man Abbott, Mr. Hume, the Cadover, New. Debat
are men etc, won't keep still, and are now pressing the
Com. to call councils, and ^{then} report on the expediency
afterwards. The Com. almost unanimously feel that
they've no authority to do so, that it would be mis-
chievous and offensive to the Corporate members
generally to do it, (without authority especially), and
that a council called about Hume at New Haven
now, would simply recommend that he go back, future
probation and all. Then other councils in other cases
would follow suit, and all the ground saved could be lost.

Now the measure of unanimity in the action
of the Prudential Com. declining to do this, and
adhering to the terms of the resolution on the sub-
ject, will be influenced by what the Com. hear from
the Corporate Members. Won't you write the Com. (or
any individual on the Com. whom you know) so
as to strengthen their position in declining to call any
such councils, or send out on their own authority
any men looking future probation? Those who are pressing
them to do it, are leaving no stone unturned to accom-
plish that object.

My Dear General

Some years since, I made your closer acquaintance, in having the pleasure of trading Pullman berths with you, en route to Omaha - for which you were unnecessarily thankful, and invited me to a visit to the White House and an introduction to Genl Hayes. This pleasure I had to forego because of business engagements.

If you still think there is an unjust balance between us, I suggest settling it, by a permit in favor of my son H. Bismarck Pracht, for a days Quail shooting on Goat Island. By so doing you will make us both happy.

I trust you continue to enjoy life and good health and am

Genl O Howard
My Dear Sir.

Permit me in opening to make a brief explanation. A year and a half ago Mrs E. Crocker gave to the City of Sac^{to} her magnificent collection of paintings worth some \$350,000, and the Lusk Art Gallery building wherein hung, & worth \$50,000. Such gifts to a small town are rare. The City could not maintain the gift without personal effort by Philanthropic citizens. Six months prior to the gift, a few citizens, only a half dozen in number organized a Secularist & Literary Society, in order to stimulate culture here. It was a feeble effort, yet it attracted some attention. Mrs Crocker heard of it, & tendered her Art Gallery to it, to use for a loan exhibition to raise means to build the Society a hall & library & lecture room. The Art Loan Exhibit was so successful that the good woman, presented the building & all her pictures therein to the Society - The

California Museum Association - We agreed to take it, when we could raise \$100,000 to endow it, in order to have an income to pay taxes etc. We soon saw that we could not get the \$100,000. It is always difficult to endow an endowment. We then asked the people if they would take the gift if Mrs. Crocker would consent to change her benefaction. They agreed and she agreed & so it was given to the City, but it was incorporated in the deed of gift that our Association should forever occupy the gallery & there in conduct our work. Then followed the great Floral Festival in honor of our Lady, Bountiful, a festival the whole State engaged in, and such a festival of flowers, as the world never had before. This is not exaggeration. Our Association took possession a year ago in May. We raised a little money and have labored to collect a museum of Natural History, to found a School of Design, to keep up a Lecture course. The first is all in embryo; the second is a year old & we believe a success artistically; the last we have particularly enjoyed in. This winter we want to do more in that line. Want of means alone cripples us, as we see so much to do for good of men & have so little to do with, while the cost of current expenses is growing. All this pardoned; I wished only that you should know who writes to you, in what behalf, & the character of the Association addressing you. When you were in fact a few weeks ago, I met you after the Sunday

Evening service, Mr Carrington introducing me. I asked you to lecture for our Association. As Chairman of the Literary Com^{tee} I was so empowered. You replied you had two lectures one on the Battle of Gettysburg & one on Genl Grant. The first illustrated by maps, plats etc, I don't know if you said lamp views, but at least it was the idea of an illustrated lecture. You added that your charge was \$50. & expenses. Our lecture room will hold 300 people & possibly a few more. But it is a hard some easy speaking room. Filling it full we can get expenses in it. That is all we care to do for our aim is to raise the intellectual standard here & entertain our youth instructively.

At a meeting of the Association held this evening at the Art Gallery Hon. Lewis Green Presiding on motion of Dr Pyburn the undersigned was instructed to address you and ask you to open our Winter Course Friday evening Dec 10. 1886, the Association to pay you your fee named by you to me \$50. & pay your expenses coming & returning & entertain you here. Our Citrus Fair opens on the 13th & lasts a week, & our last Exhibition on the 16th also (close of the first year of the School of Design) We cannot run counter to the

Northwestern Fair of course, nor postpone the
Lecture course opening until after it, as the holidays
will be upon us. The Association, therefore,
with high esteem for you, begs you to honor the
date named, & our Society. We would have
been very glad to have you, but our Meeting could not be held
earlier. We request you to give us the lecture on
Gettysburg. We think it will more interest our people
and especially as you have charts & maps to aid
in making it attractive. I have noticed
that all appeals to the eye, or amusements
of them greatly attract people. It is by
these means the best teaching influences of
the day are advanced today. That we
may properly advertise the lecture, I beg
my dear Sir that you will at once
notify me, by return mail if possible,
and that you will in the interest of the good work
we are striving to do, arrange to speak on
the date named. We desire to pack the house
& honor you with an audience of our best citizens.
Be so kind as to give me, Dear Sir, such synopsis
of facts, as will enable me to rightly announce your
lecture, & what I shall say also about plans and
charts being used. I Refer you to His Honor

In regard to Maps for Buckport
Albany, N.Y.

File
Ans Dec 11/86
1165.
Brooklyn Dec 2. 1886
My dear General,
Many thanks
for your kind and prompt
response to my letter about
the maps. I have just
learned this morning of their
safe arrival in Buckport
but feel a little troubled to
hear that your son wrote
that for governmentat reasons
you could not give them
to the Library but would
loan. Now I would like
a word of explanation from
you in regard to this. When
it was suggested to me that
you could procure a set
it did not occur to me that
there would be any difficulty
in the way of your doing so
or I would never have troubled

Will you please tell me if
you are only entitled to
one set for your own use
because in that case I shall
utterly decline to deprive
you of the maps and will
see that they are returned
to you. If it be so will you
kindly excuse my ignorance
and be assured that I
would never have asked
the favor to which you
have so generously responded.

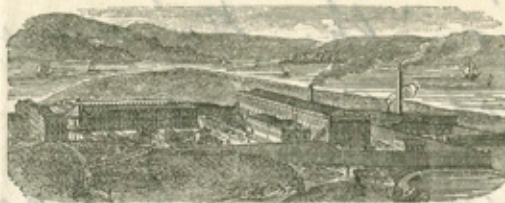

We were glad to hear of
the welfare of yourself and
family after so long a time.
We have had a pleasant
summer at Bucksport and
did not return until the
latter part of October. Mother's
health has improved and
we trust that she may
continue as comfortably
during the winter as she is

now. You have probably
received the newspaper I
sent with the best report
to be found of Dr Storrs 40th
anniversary sermons but they
convey a very slight impression
of the grand discourses each
of which occupied more than
an hour in the delivery and
were listened to by a very large
audience. On Thursday Nov 18th
the anniversary was celebrated
by a reception given to Dr
and Mrs Storrs in the church
and lecture room which was
a great success as there were
about 2000 tickets issued for
it. This was in the evening.
In the afternoon Dr Storrs
met the sunday school children
of both the chapel and home
schools. Altogether it was a most
interesting occasion and there
are not many instances in these
