Dear Gen. Howard,

In as much that you kindly favored us with your assistance at our Song service in Trenton sometime ago, I feel sure that you will be interested to know something regarding the success of our work during the season which is just closing.

We began our active campaign with the first Sunday of September, and during the first part of the season our meetings kept growing until the climax was reached about the first of January when we found it necessary to hold meetings for men every night in the week, in order to meet the demands which seem to come upon us. Even that did not seem to suffice and the first of February found us with a schedule of 21 religious meetings for men per week with definite results secured by nearly everyone.

Some of these services were held among the poorest men of the city; the drinking men, the men with clothing so wretched that they were ashamed to appear on the street, attended some of these services in large numbers, and not only these but the better class of

Mr. General O. A. Lawrence,

Governor's Palace, New York,

Dear Gent. Lawrence -

It is much that you kindly forwarded me your permanent suggestion to my office. I am sure that you are highly interested in the success of our organization and the welfare of the young men of our city. I am always open to receive any suggestions you may have, and I am sure that your interest in our work is genuine.

We began our new school year with high hopes and we hope to continue our success in the future. Our meetings are held every Saturday night in the new hall, and we have been working hard to make them successful. We are grateful for your support and we will do our best to make our work as effective as possible.

PS: I was at the pleasure to receive your letter of introduction to the President of the Young Men's Christian Association.
young men, if we may use that term, were reached through other services and brought to God and into His church. We did not confine our effort at our own building, although the structure is very commodious and well adapted to our work, but we held regular services in Morrisville, Pa., in what we called the swamp districl, and in other locations as well. The result is that 483 men have given themselves to Christ and there are 140 boys that have taken the same step since the first of September.

Of this number a great many have already found their way into the city churches and others are being taken in just as fast as proper arrangements can be made for their reception, though last Sunday saw a retrenchment in the number of services, yet we are now holding 16 religious services a week and we believe great good is being accomplished. Our social, intellectual and physical departments are strong features of our work, but we are emphasizing more than ever the distinctively religious work, and believe that God has blessed and honored His word as it has been proclaimed from our platform.

With the prayer that God will continue to bless you in your labors for Him in the future as in the past, I remain,

Sincerely yours,

The demand for maintainable systems and services is growing rapidly. The need for maintainability is not just about fixing things when they break, but about making systems that are easy to maintain from the start. This involves designing systems that are modular, with clear interfaces, and that allow for easy updates and improvements.

At the heart of maintainability is the concept of modularity. By breaking down a system into smaller, more manageable parts, it becomes easier to understand and modify. This makes it easier to identify and fix problems, and to make improvements to the system.

In addition to modularity, another key aspect of maintainability is the use of standard interfaces. This allows different components of a system to communicate with each other seamlessly, without the need for custom solutions.

Finally, maintainability requires a commitment to ongoing education and training. By ensuring that everyone involved in the development and maintenance of a system is well-trained in the latest techniques and tools, we can ensure that the system remains maintainable over time.

With this in mind, let's continue to explore ways to improve the maintainability of our systems.

General Oliver O. Howard,
Governor Ind's,
New York,

dear sir:

Kindly pardon

the liberty I take in making a request of you, a stranger to me.

As you have held high military
Positions for a great many years and have been in correspondence with many noted people during that time. I thought that possibly you might have some letters and specimens of writing from them, which you would not care to preserve, but which I would value quite highly and be glad to add to my collection.

If you would kindly favor me with any of these, your kindness would certainly be fully appreciated by me, and you would greatly oblige me.

Yours very respectfully,

Dear General,

I am more than sorry that circumstances prevent my complying with your request of the 17th, and this done you. I explain what these circumstances are.

As before explained, last year we had a raging fever on one end and cholera on the other, and any day one of the former came in, caused a life to be lost, and heavy work. We have no clerk, but horses and pack and the clerk of that month was moved from the house to keep the house for books and horses and done for a while days work at my hands. Since then the same thing has held, while I don't care if you sold them on as you have at that time let me assure you that since the 1st day of February I haven't had a dollar for income.
I hope you soon get abroad again and prove E. G. well resting. Heli she asked a fawn of me and I was 
asked and everything had to the wall. At this time I sent you 
the 20. I removed several hundred thinking at 100 or and sent 
you 200 of it as intended around 
the 10th of this month and could not. I am extremely 
sorry that you should have been placed in an inconvenient 
condition by this method. I wish assured of my intention to 
ppy the 8th of this and I 
return you best wishes that 
you are to be retired in June 
and would like to have your 
work addressed when you come to Pennsylvania. 
Wishing you every joy 
perserved and love to a room whom 
I cordially regard them

Love from your faithfully

My dear General,

It seems strange to me, but perhaps I am too impatient. Why can you not write and tell me what you are going to do with regard to the army?

In the letter you don't give from your friend, I read nothing about the time at once. Are you doing anything, or is it too late for action?

It would be a severe trial for me, to learn that my dear husband's health had all been in pain and that the winter was to be relentless to me, at least, but a death of the past. This is simply with regard to them, I write at last for this, I am most thankful and God's ways are best. Finding out to I must try and be

I also note your desire to be left to yourself during the day of the 29th, and we will respect your wishes accordingly.

I should like very much to know if it is your intention to leave Fall River on the morning of the 29th on the first train leaving at 5.30 and reaching Boston at 7.50, or whether you intend to take the next train leaving at 7.40 and reaching Boston at 9 o’clock, in order that we may have some one to meet you on your arrival.

Dear O. O. Howard,

Do you ever lecture on your army experiences? I am preparing for a course in our city next winter along historical lines. I would be glad to have one upon the life mentioned. Would prefer something I could illustrate after the lecture. Enclose a circular which will show you the character of the work done. If you would come please let me know. What your price would be. I would refer you as they responsible to Rev. T. McBurney, D.D. or Bishop Andrews at 150 - 5th Avenue near 36th. The early answer will greatly oblige.

Yours truly,

H. Hitchcock
