I will be obliged that the foregoing statement include book records only, it being wholly impracticable at this time, in view of the confused and mixed condition of the papers. I prepare even an approximate statement of what are missing. It is not

doubtful, however, that they fully equal, if not exceed, the proportion of the book records.

As the records of the late Revenue show a considerable amount of its work, so far as relates to the payment of bounty on 1, I have been notified by many of the Officers of the P.B. & P.H., (with whom have been constantly the regular agents from time to time) it may be that for a large proportion of the missing milito are not in their possession.
