Council of Science Editors Citation Quick Guide

Scientific Style and Format: The CSE Manual for Authors, Editors, and Publishers (call number T11 .S386 2014) is a detailed and authoritative manual recommending both general and scientific publication style and format for scientific papers, journal articles, books, and other forms of publication.  

CSE offers two systems for in-text references: citation-sequence (C-S) and name-year (N-Y). Please note that the use of “anonymous” is not allowed under this citation style. Simply omit the author field if author is unknown.
